Fluency With Information Technology 5th Edition:

Great Principles of Computing Peter J. Denning, Craig H. Martell, 2015-01-16 A new framework for understanding computing a coherent set of principles spanning technologies domains algorithms architectures and designs Computing is usually viewed as a technology field that advances at the breakneck speed of Moore's Law If we turn away even for a moment we might miss a game changing technological breakthrough or an earthshaking theoretical development This book takes a different perspective presenting computing as a science governed by fundamental principles that span all technologies Computer science is a science of information processes We need a new language to describe the science and in this book Peter Denning and Craig Martell offer the great principles framework as just such a language This is a book about the whole of computing its algorithms architectures and designs Denning and Martell divide the great principles of computing into six categories communication computation coordination recollection evaluation and design They begin with an introduction to computing its history its many interactions with other fields its domains of practice and the structure of the great principles framework They go on to examine the great principles in different areas information machines programming computation memory parallelism queueing and design Finally they apply the great principles to networking the Internet in particular Great Principles of Computing will be essential reading for professionals in science and engineering fields with a computational branch for practitioners in computing who want overviews of less familiar areas of computer science and for non computer science majors who want an accessible entry way to the field

Cases on Digital Technologies in Higher Education: Issues and Challenges Luppicini, Rocci, Haghi, A.K., 2010-05-31 This book focuses on the institutionalization of technology into education specifically discussing the integration of technology and new techniques into various areas of higher education Provided by publisher International Handbook of Primary Technology Education Clare Benson, Julie Lunt, 2011-11-16 This international handbook offers an in depth study of the development of primary Technology or Design and Technology education worldwide It is unique in that it focuses on the way in which the building blocks for this subject have been established providing much needed research and information for those involved with secondary education and beyond to draw on The inclusion of Technology education into primary curricula has gathered momentum for the last two decades as its importance and relevance to children s lives has been realised by educators This handbook offers a detailed insight into the many and varied ways in which countries have

incorporated the subject into children's primary school experiences and issues that have arisen during its implementation. The authors all work in the field of primary technology education and have been actively involved in curriculum development and research in their own countries. The first part of the book is devoted to the introduction, the development and implementation of Technology education into the primary curricula of countries worldwide. Reasons for this movement, successes and barriers to development are discussed and speculation about the future of Technology education is reflected upon. The second part of the book relates to issues that have arisen as the subject has grown over the last twenty years and consideration needs to be given to these if future successes are to be achieved. Classroom practice including designing and ICT teacher education, enterprise sustainability and indigenous technology are all reflected upon and support the notion of technology as a valued and valuable part of the primary curriculum. This book should be of interest to undergraduate and graduate students, practitioners, researchers, curriculum developers, policy makers and professional development providers who are involved with and have an interest in primary technology education worldwide.
