Foreign Bodies English Edition:

A Practical Treatise on Foreign Bodies in the Air-passages Samuel David Gross, 1854 **Foreign Bodies** Madeleine Dobie, 2001 Building on the critical foundations established by Edward Said in *Orientalism* *Foreign Bodies* examines the relationship between the Orientalist tradition in French art and literature and France's colonial history. It focuses on a central dimension of this exchange: the prevalent figure of the oriental woman and the interplay of race and gender in both domestic and colonial history. It also offers a genealogy of contemporary French attitudes to Islamic culture in which beliefs about sexuality and gender relations continue to occupy a privileged place. The author examines the extent to which the rhetorical status and political implications of Orientalism register the changing circumstances of French colonial activity, tracing the convergence or divergence of colonial practice and the literary record. She also argues against the tendency in both historical and theoretical writing on colonialism to divide center from margins, metropolitan from colonial. Instead, she shows how colonial products and ideas permeated the domestic culture and shaped its evolution. Finally, the book proposes that the feminine figures of Orientalist texts are often interwoven with representations of language and more specifically with representations of language as an alien and resistant code, something other than the transparent medium of ideas. It suggests that in promoting awareness that language is not simply the neutral medium of thought and experience, these veiled figures of language function as foreign bodies, creating disruptive effects within an economy orchestrated toward the production of knowledge of the other. However, the book also argues against the view espoused by certain critics that the self-reflexivity of Orientalist writing fully counteracts its polarizing political effects, arguing instead for a process of double reading that acknowledges both the geopolitical power encoded within Orientalist representation and the ways in which specific texts resist this power.

Foreign Bodies and the Body Politic Jonathan Gil Harris, 1998-05-07 Jonathan Gil Harris examines the origins of modern discourses of social pathology in Elizabethan and Jacobean medical and political writing. Plays, pamphlets, and political treatises of this period display an increasingly xenophobic tendency to attribute England's ills to foreign bodies such as Jews, Catholics, and witches, as well as to treat their allegedly poisonous features for the health of the body politic. Harris argues that this tendency resonates with two of the distinctive paradigms of Paracelsus's pharmacy, which also includes the notion that poison has a medicinal power. The emergence of these paradigms in early modern English political thought signals a decisive shift from Galenic humoral tradition towards twentieth-century politico-medical discourses of infection and containment, which like their early modern predecessors make mysterious the domestic origins of social conflict and the operations of political authority.

Waiting for Godot - Samuel Beckett, New Edition Harold Bloom, 2009 Presents a series of critical essays discussing the structure themes and subject matter of Samuel Beckett's *Waiting for Godot*

The Conference of the Tongues Theo Hermans, 2014-06-03 The Conference of the Tongues offers a series of startling reflections on fundamental questions of translation It throws new light on familiar problems and opens up some radically different avenues of thought It engages with value conflicts in translation and the social accountability of translators and turns the old issue of equivalence inside out Drawing on a wealth of contemporary and historical examples the book teases out the translator's subject position in translations makes notions of intertextuality and irony serviceable for translation studies tries to think translation without transformation and uses a controversial sociological model to cast a cold eye on the entire world of translating This is a highly interdisciplinary study that remains aware of the importance of theoretical paradigms as it brings concepts from international law social systems theory and even theology to bear on translation Self reference is a recurrent theme The book invites us to read translations for what they can tell us about translating and about translators own perceptions of their role The argument throughout is for more self reflexive translation studies

performance it addresses current issues concerning the role of the translator for the stage as opposed to the one for the editorial market within a multifarious cultural context The current debate has shown a growing tendency to downplay and challenge the notion of translational accuracy in favor of a recreational and post dramatic attitude underlying the role of the director and playwright instead This book discusses the delicate balance between translating and directing from an intercultural semiotic aesthetic and interlingual perspective taking a critical stance on approaches that belittle translation for the theatre or equate it to an editorial practice focused on literality Chapters emphasize the idea of dramatic translation as a particular and extremely challenging type of performance while consistently exploring its various textual intertextual intertranslational contextual cultural and intercultural facets The notion of performance is applied to textual interpretation as performance interlingual versus intersemiotic performance and inter cultural performance in the adaptation of translated texts for the stage providing a wide ranging discussion from an international group of contributors directors and translators

Signing the Body Katherine Dauge-Roth, 2019-11-14 The first major scholarly investigation into the rich history of the marked body in the early modern period this interdisciplinary study examines multiple forms uses and meanings of corporeal inscription and impression in France and the French Atlantic from the late sixteenth through early eighteenth centuries Placing into dialogue a broad range of textual and visual sources drawn from areas as diverse as demonology jurisprudence mysticism medicine pilgrimage commerce travel and colonial conquest that have formerly been examined largely in isolation Katherine Dauge Roth demonstrates that emerging theories and practices of signing the body must be understood in relationship to each other and to the development of other material marking practices that rose to prominence in the early modern period While each chapter brings to light the particular histories and meanings of a distinct set of cutaneous marks devil s marks on witches demon s marks upon the possessed devotional wounds Amerindian and Holy Land pilgrim tattoos and criminal brands each also reveals connections between these various types of stigmata links that were obvious to the early modern thinkers who theorized and deployed them Moreover the five chapters bring to the fore ways in which corporeal marking of all kinds interacted dynamically with practices of writing on imprinting and engraving paper parchment fabric and metal that flourished in the period together signaling important changes taking place in early modern society Examining the marked body as a material object replete with varied meanings and uses **Signing the Body Marks on Skin in Early Modern France** shows how the skin itself became the register of the profound cultural and social transformations that characterized this era

Spiritualism and Phenomenology Emmanuel Falque, 2025-04-08 The conflict between spiritualism and phenomenology will no longer take place Better it is through their encounter and their backlash that a new fruitfulness for thought will develop The case of Maine de Biran thus comes to exemplify a new beginning a la francaise for metaphysics on the one hand and for phenomenology on the other But the philosopher from Bergerac in the Dordogne is most often read according to his explicit meaning and not his implicit one He is supposedly the thinker of freedom and consciousness

spiritualism or of the inner self and the lived body phenomenology But these readings forget the exceptions to the primitive fact of internal effort illness sleep sleepwalking madness the body object the outer self which mark Biran's oeuvre as one of the summits of a thought that escapes phenomenality and confers a real consistency upon corporeality A new Columbus of metaphysics as he himself names himself Maine de Biran read otherwise initiates for today a new beginning for thought
