The Routledge International Handbook of Forensic Intelligence and Criminology Quentin Rossy, David Décary-Héту, Olivier Delémont, Massimiliano Mulone, 2017-12-06. Despite a shared focus on crime and its extended family, forensic scientists and criminologists tend to work in isolation rather than sharing the data, methods, and knowledge that will broaden the understanding of the criminal phenomenon and its related subjects. Bringing together perspectives from international experts, this book explores the intersection between criminology and forensic science and considers how knowledge from both fields can contribute to a better understanding of crime and offer new directions in theory and methodology. This handbook is divided into three parts. Part I explores the epistemological and historical components of criminology and forensic science, focusing on their scientific and social origins. Part II considers how collaboration between these disciplines can bring about a better understanding of the organizations and institutions that react to crime, including the court, intelligence, prevention, crime scene investigation, and policing. Part III discusses the phenomena and actors that produce crime, including a reflection on the methodological issues, challenges, and rewards regarding the sharing of these two disciplines. The objective of this handbook is to stimulate a new interdisciplinary take on the study of crime, to show how both forensic and criminological theories and knowledge can be combined to analyse crime.
