**The Political Economy of Fracking** Ilia Murtazashvili, Ennio Piano, 2018-12-07 Over the past two decades fracking has led to a revolution in shale gas production For some shale gas promised economic opportunities cheaper energy bills and an alternative to coal For others shale gas was fool's gold Critics contend that the shale boom has occurred in a regulatory Wild West that the response has been fractured and ineffective or that the harmful environmental and health consequences exceed the benefits from shale gas production The Political Economy of Fracking argues that the criticism of the shale revolution has been misplaced The authors use insights from a diversity of perspectives in political economy to understand why the shale boom occurred who won in the race for shale and who was left behind The book explains how private property rights and entrepreneurs led to the shale boom It contends that polycentric governance which encourages a diversity of regulatory responses is a virtue because it generates knowledge about the most appropriate ways to regulate shale development Private property rights and political institutions that provide for local self governance also helped to ensure that the benefits of shale gas production exceeded its costs The authors make the case for fracking shale gas using evidence from shale producing countries from around the world comparing them to those that have fallen behind in the shale race They show that private property rights and markets have been a source of innovation and dynamism and that a diversity of regulatory responses is appropriate to govern shale gas development This book is insightful reading for academics and professionals interested in the shale boom the fracking industry in general and regulatory policy      *The Privatization Process* Terry Lee Anderson, Peter Jensen Hill, 1996 Contiene Introduction The political economy of privatization Privatization for economic development The missing ingredient what poor countries will need to make their markets work Privatization incentives and economic performance Taxation enforcement costs and the incentives to privatize Growing a post communist legal system Spontaneous privatization in transition economies      **Environmental Water Markets and Regulation** Katherine Owens, 2016-11-18 River systems around the world are degraded and are being used unsustainably Meeting this

challenge requires the development of flexible regimes that have the potential to meet essential consumptive needs while restoring environmental flows This book focuses on how water trading frameworks can be repurposed for environmental water recovery and aims to conceptualise the most appropriate role for law in supporting recovery through these frameworks The author presents a comprehensive study of the legal frameworks in four jurisdictions the States of Oregon and Colorado in the western United States the province of Alberta in Canada and the Murray Darling Basin in Australia Basin State of New South Wales A close comparative analysis of these four jurisdictions reveals a variety of distinctive regulatory arrangements and collaborations between public and private actors In all cases the law has been deployed to steer and coordinate these water governance activities The book argues that each regime is based on a particular regulatory strategy with different conceptions of the appropriate roles for and relationships between various actors and institutions Legal frameworks do not have the capacity to rationalise and provide an overarching and absolute solution to the complex environmental and governance issues that arise in the context of environmental water transactions Rather the role of law in this context needs to be reconceptualised within the paradigm of regulatory capitalism as establishing and maintaining the limits within which regulatory participants can operate innovate and collaborate
