*Tarbell's Teachers' Guide to the International Sunday-school Lessons for 1910* Martha Tarbell,1909 **Research for Materials Development in Language Learning** Brian Tomlinson,Hitomi Masuhara,2010-11-18 This title examines current research in materials development and discusses their implications for the learning and teaching of languages Recently there

has been a dramatic increase in the attention given to materials development as an academic discipline. More universities are including modules on materials development on their MA in applied linguistics courses and more students are studying materials development in their PhD research. Yet to date there has been no publication focusing on reporting and discussing the results of research in materials development. This fills that gap reporting on the results of recent research projects in materials development and discussing their implications for the learning and teaching of languages. The editors' introduction outlines the rationale, scope and objectives of the book and reviews previously published reports of research in materials development. There are concluding chapters which point out implications for second language acquisition theory and research methodology. The book features suggestions for applications of the reported research for materials development and proposals for future action in research in materials development for language teaching.
