Handbook of Quality-standard Papers American Writing Paper Company,1922 **Designing Learning with Embodied Teaching** Fei Victor Lim,2020-08-27 Teaching and learning involve more than just language The teachers use of gestures the classroom spaces they occupy and the movements they make as well as the tools they use work together with language as a multimodal ensemble of meanings Embodied teaching is about applying the understandings from multimodal communication to the classroom It is about helping teachers recognise that the moves they make and the tools they use in the classroom are part of their pedagogy and contribute to the design of the students learning experience In response to the changing profile and needs of learners in this digital age pedagogic shifts are required A shift is the evolving role of teachers from authority of knowledge to designers of learning This book discusses how using examples drawn from case studies teachers can use corporeal resources and digital tools to design learning experiences for their students It advances the argument that the study of the teachers use of language gestures positioning and movement in the classroom from a multimodal perspective can be productive This book is intended for educational researchers and teacher practitioners as well

as curriculum specialists and policy makers The central proposition is that as teachers develop a semiotic awareness of how their use of various meaning making resources express their unique pedagogy they can use these multimodal resources aptly and fluently to design meaningful learning experiences This book also presents a case for further research in educational semiotics to understand the embodied ways of meaning making in the pedagogic context
