Breaking Out of Fragility World Bank,2020-10-08 Iraq is at a crossroads Almost two decades after the 2003 war the country remains caught in a fragility trap facing increasing political instability growing social unrest and a deepening state citizen divide Amid a multitude of crises including an oil price shock the COVID 19 pandemic and recent instability and protests coupled with poor economic policies a lack of reforms and an inability to tackle corruption Iraq is having its worst annual economic growth performance in 2020 since the fall of the Saddam regime But with every crisis comes an opportunity to reform Iraq can embark on a long but much needed path toward structural transformation one that could leave its economy less dependent on oil and more driven by private sector activity Such a path can no longer be avoided as has been illustrated by the widespread protests since October 2019 This report highlights what Iraq can do to sustain future growth it also shows why Iraq has not yet managed to achieve high levels of diversified growth alongside peace stability and a better standard of

living for its people Iraq's high levels of fragility and conflict reinforced by high oil dependency hinder the country's prospects for economic reform and growth Despite Iraq's existing sociopolitical and economic environment three encouraging messages emerge from this report First there is a peace dividend in Iraq Iraq's per capita GDP was about one fifth lower in 2018 than it would have been if not for the conflict beginning in 2014 Thus maintaining peace can by itself be a strong driver of growth Second Iraq has latent export potential for a variety of goods that if tapped could diversify the country's economy raise living standards and boost economic resilience Third Iraqi agriculture could be revived to serve as a pillar of a more diversified and private sector led economy

What's Our Problem? Tim Urban, 2023-02-21 From the creator of the wildly popular blog Wait But Why a fun and fascinating deep dive into what the hell is going on in our strange unprecedented modern times Between 2013 and 2016 Tim Urban became one of the world's most popular bloggers writing dozens of viral long form articles about everything from AI to colonizing Mars to procrastination Then he turned his attention to a new topic the society around him Why was everything such a mess Why was everyone acting like such a baby When did things get so tribal Why do humans do this stuff This massive topic sent Tim tumbling down his deepest rabbit hole yet through mountains of history evolutionary psychology political theory neuroscience and modern day political movements as he tried to figure out the answer to a simple question What's our problem Six years later he emerged from the hole holding this book What's Our Problem is a deep and expansive

analysis of our modern times in the classic style of Wait But Why packed with original concepts sticky metaphors and 300 drawings The book provides an entirely new framework and language for thinking and talking about today s complex world Instead of focusing on the usual left center right horizontal political axis which is all about what we think the book introduces a vertical axis that explores how we think as individuals and as groups Readers will find themselves on a delightful and fascinating journey that will ultimately change the way they see the world around them Anyway he wanted to say a lot more about all of this but there was a word limit on this book description so just go read the book **Resources in Education**
