Automation ,1965 Fundamentals of Latex Film Formation Joseph Keddie,Alexander F. Routh,2010-02-18 This book has emerged out of our long time research interests on the topic of latex film formation Over the years we have built up a repertoire of slides used in conference presentations short courses and tutorials on the topic The story presented in this book has thereby taken shape as it has been told and re told to a mix of academic and industrial audiences The book presents a wide body of work accumulated by the polymer colloids community over the past five decades but the selection of examples has been flavoured by our particular experimental interests and development of mathematical models We intend the book to be a starting point for academic and industrial scientists beginning research on latex film formation The emphasis is on fundam tal mechanisms however and not on applications nor on specific effects of formu tions We hope that the book consolidates the understanding that has been achieved to date in the literature in a more comprehensive way than is possible in a review article We trust that the reader will appreciate the fascination of the topic **Metal Products Manufacturing**

Madder Red Robert Chenciner,2003-09-02 Madder red is an ancient dyestuff extracted from the root of the madder plant growing in many countries around the world The secret and devilishly complex Oriental dyeing process to obtain the lustrous colour known as Turkey Red was avidly sought by Europeans from the time before the fall of Ancient Rome It was finally cracked by the French about 1760 who were able to dye wool silk and cotton bright red After the lowlands of the Caspian Caucasus had been subdued by the Russians in the early 1800s madder was cultivated there and rapidly became the main crop The quest for Turkey Red went hand in hand with an avalanche of scientific research which not only improved the yield of dyestuff from the roots but led to its chemical synthesis and in 1870 the collapse of the world wide madder industry Many of the nascent dye companies grew into chemical giants of our time Further regional and cultural background may be found in Chenciner s Daghestan Tradition and Survival also published in the Caucasus World series **Scientific American**
