family history to find the inheritance of a trait is the fundamental concept in human genetics The collected information on the
family can be presented in an easily readable chart called Pedigree Hand drawn pedigrees become difficult when there is a
large collection of known individuals in the family Hence Pedigree tool was developed which automatically creates the
Ancestor tree and Descendant tree This tool also has an option to find the unrelated individuals Inserting individual details
into the database can also be done using this tool Thus this user friendly Java based application can help researchers and
genetic counselors to investigate the genetic cause of the hereditary diseases Discovering the genes that are involved in
susceptibility to the diseases will be useful for earlier diagnosis and treatment to slow or prevent the disease Abstract
