Human Factors and Ergonomics in Consumer Product Design Waldemar Karwowski,Marcelo M. Soares,Neville A. Stanton,2011-06-22 Every day we interact with thousands of consumer products We not only expect them to perform their functions safely reliably and efficiently but also to do it so seamlessly that we don't even think about it However with the many factors involved in consumer product design from the application of human factors and ergonomics principles to red

Biological Safety & European Medical Device Regulations , **Health Information Systems** Adrian Stavert-Dobson,2015-12-21 This is a practical book for health and IT professionals who need to ensure that patient safety is prioritized in the design and implementation of clinical information technology Healthcare professionals are increasingly reliant on information technology to deliver care and inform their clinical decision making Health IT provides enormous

benefits in efficiency communication and decision making However a number of high profile UK and US studies have concluded that when Health IT is poorly designed or sub optimally implemented then patient safety can be compromised Manufacturers and healthcare organizations are increasingly required to demonstrate that their Health IT solutions are proactively assured Surprisingly the majority of systems are not subject to regulation so there is little in the way of practical guidance as to how risk management can be achieved The book fills that gap The author a doctor and IT professional harnesses his two decades of experience to characterize the hazards that health technology can introduce Risk can never be eliminated but by drawing on lessons from other safety critical industries the book systematically sets out how clinical risk can be strategically controlled The book proposes the employment of a Safety Case to articulate and justify residual risk so that not only is risk proactively managed but it is seen to be managed These simple techniques drive product quality and allow a technology s benefits to be realized without compromising patient safety

Multicriteria and Multiobjective Models for Risk, Reliability and Maintenance Decision Analysis Adiel Teixeira de Almeida, Cristiano Alexandre Virgínio Cavalcante, Marcelo Hazin Alencar, Rodrigo José Pires Ferreira, Adiel Teixeira de Almeida-Filho, Thalles Vitelli Garcez, 2015-07-01 This book integrates multiple criteria concepts and methods for problems within the Risk Reliability and Maintenance RRM context The concepts and foundations related to RRM are considered for this integration with multicriteria approaches In the book a general framework for building decision models is presented and this is illustrated in various chapters by discussing many different decision models related to the RRM context The scope of the book is related to ways of how to integrate Applied Probability and Decision Making In Applied Probability this mainly includes decision analysis and reliability theory amongst other topics closely related to risk analysis and maintenance In Decision Making it includes a broad range of topics in MCDM Multi Criteria Decision Making and MCDA Multi Criteria Decision Aiding also known as Multi Criteria Decision Analysis In addition to decision analysis some of the topics related to Mathematical Programming area are briefly considered such as multiobjective optimization since methods related to these topics have been applied to the context of RRM The book addresses an innovative treatment for the decision making in RRM thereby improving the integration of fundamental concepts from the areas of both RRM and decision making This is accomplished by presenting an overview of the literature on decision making in RRM Some pitfalls of decision models when applying them to RRM in practice are discussed and guidance on overcoming these drawbacks is offered The procedure enables multicriteria models to be built for the RRM context including guidance on choosing an appropriate multicriteria method for a particular problem faced in the RRM context The book also includes many research advances in these topics Most of the multicriteria decision models that are described are specific applications that have been influenced by this research and the advances in this field Multicriteria and Multiobjective Models for Risk Reliability and Maintenance Decision Analysis is implicitly structured in three parts with 12 chapters The first part deals with MCDM A concepts methods and decision processes The

second part presents the main concepts and foundations of RRM Finally the third part deals with specific decision problems in the RRM context approached with MCDM A models
