The Palgrave Handbook of Africa and the Changing Global Order Samuel Ojo Oloruntoba, Toyin Falola, 2021-11-22 This handbook fills a large gap in the current knowledge about the critical role of Africa in the changing global order By connecting the past present and future in a continuum that shows the paradox of existence for over one billion people the book underlines the centrality of the African continent to global knowledge production the global economy global security and global creativity Bringing together perspectives from top Africa scholars it actively dispels myths of the continent as just a passive recipient of external influences presenting instead an image of an active global agent that astutely projects soft power Unlike previous handbooks this book offers an eclectic mix of historical contemporary and interdisciplinary approaches that allow for a more holistic view of the many aspects of Africa's relations with the world Silk Road to Belt Road Md. Nazrul Islam, 2018-11-30 This volume approaches China's Belt and Road Initiative as a process of culturalization one that started with the Silk Road and continued over the millennium In mainstream literature the Belt and Road Initiative BRI has been portrayed as the geo economic vision and geo political ambition of China's current leaders intended to shape the future of the world However this volume argues that although geo politics and geo economy may play their part the BRI more importantly creates a venue for the meeting of cultures by promoting people to people interaction and exchange This volume explores the journey from the Silk Road to Belt Road by analyzing topics ranging from history to religion from language to culture and from environment to health As such scholars academics researchers undergraduate and graduate students from the Humanities Social Sciences and Business will find an alternative approach to the Belt and Road Initiative

Global Imperialism and the Great Crisis Ernesto Screpanti, 2014 In this provocative study economist Ernesto Screpanti argues that imperialism is far from disappearing or mutating into a benign globalized form It has in fact entered a new phase which he terms global imperialism This is a phase defined by multinational firms cut loose from the nation state framework and free to chase profits over the entire surface of the globe No longer dependent on nation states for building a political consensus that accommodates capital accumulation these firms seek to bend governments to their will and destroy barriers to the free movement of capital And while military force continues to play an important role in imperial strategy it is the discipline of the global market that keeps workers in check by pitting them against each other no matter what their national origin This is a world in which the so called labor aristocracies of the rich nations are demolished the power of states to enforce checks on capital is sapped and global firms are free to pursue their monomaniacal quest for profits unfettered by national allegiance Screpanti delves into the inner workings of global imperialism explaining how it is different from past forms of imperialism how the global distribution of wages is changing and why multinational firms have strained to break free of national markets He sees global imperialism as a developing process one with no certain outcome But one thing is clear when economic crises become opportunities to discipline workers and when economic policies are

imposed through increasingly authoritarian measures the vision of a democratic and humane world is what is ultimately at stake *Societies in Transition* Savvas Katsikides,Pavlos I. Koktsidis,2015-03-26 This edited volume discusses critically the social implications of current structural transformations in Europe within the broader context of the global financial crisis Experts from across Europe and the US discuss challenges and solutions to political and economic stability security growth governance and integration on a country and regional level especially focusing on vulnerable Southern and Eastern European states New economic political and security processes and realities are examined closely with the aim to describe them in a coherent framework Drawing on carefully selected interdisciplinary research this collection offers fresh insights into the social repercussions of the transition from traditionally established practices and perceptions to new forms of collaboration integration and governance **Financial Innovations and Monetary Reform** Jean-François Serval,Jean-Pascal

Tranié,2023-01-30 Written by two leading experts on multinational accounting and billion dollar international investment funds this book provides a framework for a global reform of the world monetary system and defines a decidedly new approach to dealing with public debt mortgage an issue that we can see in many countries in Europe and around the world The authors put forward a proposal for transforming sterile financial masses which are withdrawn from the real economy as they no longer bear interest into wealth To facilitate this return to the real economy the authors propose that a significant share of public debt be converted into net equities in the world of business and goods production in order to find new profitable investment projects The idea is bold and the authors strive to demonstrate its technical feasibility They are convinced that this approach can accompany and enhance a movement that has already begun namely the implementation of vast national and international investment programs in major infrastructures and research projects in innovative sectors This work builds on the authors two previous books which focus on the monetary system The first published in 2010 and including a foreword by former French Finance Minister Christine Lagarde analyzes the new virtual dimension of money The second published in 2014 puts forward an innovative proposal for a new financial regulation aimed at more stable economies This third book is intended for professionals in the financial industry including decision makers at banks accounting and private equity firms as well as policymakers at central banks and government institutions involved in the implementation of financial and monetary reforms Proceedings of the 9th International Conference on Accounting, Management, and Economics

One World Mania Graham Dunkley,2016-10-15 In this much needed book Graham Dunkley challenges the oft repeated notion that free trade and global integration are the best means of development for all nations at all times an idea that has proved even more misguided in the wake of the global financial crisis By contrast Dunkley reveals through a wide range of statistical analysis and case studies that at best the evidence is mixed Looking systematically at issues such as trade led growth supply chains and financialization One World Mania reveals the many problems that over globalization has caused often at great human cost An indispensable guide for anyone wishing to understand the shortcomings of current global economic policies

The Political Economy of Underdevelopment in Sub-Saharan Africa Christopher E.S. Warburton,2024-10-14 This book provides a unique combination of history politics and economics to rationalize the progression of underdevelopment in Sierra Leone and the challenges of economic growth and development confronting some Sub Saharan African countries It concisely presents the internal frictions that are most responsible for the underdevelopment of Sierra Leonean since 1961 while also benchmarking the performance of the country with some countries in the subregion Europe the US Latin America and Asia It highlights the external threats that are highly capable of stifling the economic growth and sustainable development of the country including sovereign debt the paucity of human capital the use of natural resources and external shocks The central concepts of analysis include the premise for underdevelopment contexts for business strategies and rivalry in an underdeveloped economy economic growth productivity sustainable development international trade and threats to macroeconomic stability in the form of volatile commodity prices loss of competitiveness inaccessible foreign markets deficient healthcare infrastructure the cost of unsustainable sovereign debt and the viability of long term investments The book has been intentionally developed for all those who are strongly interested in the political economy of Sub Saharan Africa with particular emphasis on Sierra Leone empirical work on economic growth and development academic instruction on international political economy international organizations and policymakers

Growth and International Trade Karl Farmer,Matthias Schelnast,2013-02-01 This textbook guides the reader towards various aspects of growth and international trade in a Diamond type overlapping generations framework Using the same model type throughout the book timely topics such as growth with bubbles debt reduction in rich countries and policies to mitigate climate change are explored The first part starts from the old growth theory and bridges to the new growth theory including R D and human capital approaches The second part presents an intertemporal equilibrium theory of inter and intra sectoral trade and concludes by analyzing the debt mechanics inducing the huge imbalances among eurozone

countries The book is primarily addressed to graduate students wishing to proceed to the analytically more demanding journal literature
