

LANDSCAPING SAFETY

According to OSHA, landscapers are exposed to all kinds of different hazards on a daily basis, ranging from heat and weather hazards, chemical exposures, accidents with machinery or tools, construction dangers, and the physical stress of lifting and other awkward postures.

LANDSCAPING HAZARDS

Landscapers are in danger of facing several hazards in the industry. These hazards include cuts and amputations, electrical hazards, ergonomics, heat and cold stress, lifting and awkward postures, motor vehicles, noise, pesticides and chemicals, and slips, trips, and falls.

SOIL PREPARATION & GRADING

The common hazards that occur during soil prep and grading include equipment accidents, slips and trips, vehicle accidents, cuts and amputations, and hearing loss. Combat these hazards by training and certifying operators and drivers. Make sure workers wear ear protection and boots with traction soles, and stay clear of tiller blades.

IRRIGATION & HARDSCAPE CONSTRUCTION

During irrigation, make sure workers wear protective gloves, stay clear of trencher blades, and that the equipment is inspected. During hardscape construction, ensure that equipment safeguards are functional and in place, utilize protective systems, and provide the proper PPE, including ear protection, and saw training.

PLANTING & TREE CARE

For planting, train and certify drivers and make sure that equipment is inspected before use. Landscapers must keep the jobsite clean, drink plenty of water and take rest breaks, and get help for lifting. Tree care workers must wear safety goggles, hard hats, chaps, and ear protection, and comply with the 10-foot power line clearance rule.

LAWN & LANDSCAPE MAINTENANCE

Train drivers to avoid accidents and implement an effective hazard communication program that includes employee training. Workers should wear gloves, protective goggles while using blowers, ear protection while using power equipment, maintain comfortable mower settings, and use safe-lifting techniques.
