Discourses of Menstruation Victoria Louise Newton, 2016-05-24 Menstruation is a topic which is both everyday and sensitive. From Leviticus to Pliny to twentieth century debates around menotoxin to advertising and having the painters in Victoria, Newton's book offers a lively and innovative exploration of the social and cultural dimensions of menstruation. Through in-depth interviews with men and women, the book explores the many different ways in which this sensitive topic is spoken about in British culture. Looking specifically at euphemism, jokes, popular knowledge, everyday experience, and folklore, the book provides original insights into the different discourses acting on the menstruating body and encourages debate about how these help to shape our everyday attitudes towards menstruation. **Constructing Virtue and Vice** Olga V.

Trokhimenko, 2014 The study examines textual representations of women's laughter and smiling and their imagined connection to female virtue in a wide variety of discourses and contexts of the German Middle Ages, including medieval epic, ecclesiastical texts, conduct literature, lyric, and sculpture. By engaging with the competing and at times contradictory views of female laughter, it reaffirms a disputatious nature of medieval culture in which multiple views of femininity, sexuality, and virtue stood in a conflicting yet productive dialogue with one another. The society that emerges when one looks at medieval German texts is always ambivalent; it thrives on and enjoys talking about sensuality and eroticism while being constrained by the conventions of polite behavior and the fear of sin. It relies on the ritual use of laughter while marking it as a sign of lust and perdition. Women's laughter thus offers an important way into understanding medieval views of gender because it combines physicality with shifting and conflicting cultural norms. Conceiving bodies Dana Oswald, 2024-05-28 Despite reliance on ingredients like horse dung, Old English remedies for women's medicine speak to contemporary reproductive concerns. Previous translators reduced the remedies to a general category of women's medicine, but sustained examination of language reveals important distinctions. Remedies for menstruation indicate social concerns about fertility, where remedies for cleansing do not provide a clear path to conception but rather foreclose it. Rarest of all are the remedies for childbirth, but their rarity is compounded by the practices of translators who conflate the language for women's reproduction into an amorphous singularity. Through an original method of hysteric philology, the combining of traditional philology with contemporary feminist and medical epistemologies, this book situates itself in the historical treatment of reproductive people as both objects and subjects of medical practice and gestures forward in time to the contemporary struggle for bodily autonomy.
