EU Law of Competition and Trade in the Pharmaceutical Sector Pablo Figueroa,Alejandro Guerrero,2019 This book provides a systematic analysis of the law and practice of EU competition and trade in the pharmaceutical sector Authored by leading private practitioners economists scholars and high level officials at competition regulators this work provides valuable insider knowledge on the

application of law and policies to the pharmaceutical industry The work contains extensive commentary on the legislation and the latest case law and administrative precedents in this sector at both EU and national level including certain significant jurisdictions e g the US China Coverage of various key developments includes the recent pay for delay antitrust investigations the perennial issues around parallel trade and an examination of mergers among pharmaceutical companies and medical devices manufacturers In addition to the legal analysis it offers vital economic and business perspectives to ensure that the reader has the full range of tools with which to prepare for cases and conduct transactions within the pharmaceutical industry Repetitive Structures in Biological Sequences: Algorithms and Applications Marco

Pellegrini,Alberto Magi,Costas S. Iliopoulos,2016-10-27 Repetitive structures in biological sequences are emerging as an active focus of research and the unifying concept of repeatome the ensemble of knowledge associated with repeating structures in genomic proteomic sequences has been recently proposed in order to highlight several converging trends One main trend is the ongoing discovery that genomic repetitions are linked to many biological significant events and functions Diseases e g Huntington s disease have been causally linked with abnormal expansion of certain repeating sequences in the human genome Deletions or multiple copy duplications of genes Copy Number Variations are important in the aetiology of cancer Alzheimer and Parkinson diseases A second converging trend has been the emergence of many different models and algorithms for detecting non obvious repeating patterns in strings with applications to in genomic data Borrowing methodologies from combinatorial pattern matching string algorithms data structures data mining and machine learning these new approaches break the limitations of the current approaches and offer a new way to design better trans disciplinary research The articles collected in this book provides a glance into the rich emerging area of repeatome research addressing some of its pressing challenges We believe that these contributions are valuable resources for repeatome research and will stimulate further research from bioinformatic statistical and biological points of view GeNeDis 2016 Panayiotis

Vlamos,2017-10-01 The 2nd World Congress on Genetics Geriatrics and Neurodegenerative Disease Research GeNeDis 2016 will focus on recent advances in geriatrics and neurodegeneration ranging from basic science to clinical and pharmaceutical developments and will provide an international focum for the latest scientific discoveries medical practices and care initiatives Advances information technologies will be discussed along with their implications for various research implementation and policy concerns In addition the conference will address European and global issues in the funding of long term care and medico social policies regarding elderly people GeNeDis 2016 takes place in Sparta Greece 20 23 October 2016 This volume focuses on thesessions that address neurodegenerative diseases *Managing Sustainable Stakeholder Relationships* Linda O'Riordan,2017-09-01 This book examines corporate approaches to responsible management by investigating the stakeholder relationships between business and society Though concepts of responsible management continue to evolve its key objective is to explore the opportunities and dilemmas which business decision makers face when

attempting to reconcile their organisation's interests with those of other stakeholder groups. In this intensely debated field, it focuses on the power of entrepreneurial purpose and the opportunities which emerge when corporate choices and actions are driven by connected stakeholder interests. A case study of the pharmaceutical industry in the UK and Germany is presented to reveal how decision makers in this particular sector are responding to their context-specific management challenges. The research findings are subsequently employed to examine and revise a pre-specified stakeholder management framework which was previously developed by the author. The proposed updated framework is the book's main conceptual contribution. By depicting a set of inclusive, integrated and inter-related steps, it is intended to provide an innovative, comprehensive practical toolkit for stakeholder management. As such, it is designed to help decision makers to attain the greatest possible outcome from the resources they invest by consciously basing their choices not merely on the impacts for their shareholders but also, and more holistically, for a broader range of stakeholders. Ultimately, the book demonstrates how optimally harmonised stakeholder management can serve as a powerful catalyst for unlocking viable business opportunities which serve the interests of business and society.

Philosophical Issues in Pharmaceuticals Dien Ho, 2017-02-27 This anthology provides a collection of new essays on ethical and philosophical issues that concern the development, dispensing and use of pharmaceuticals. It brings together critical ethical issues in pharmaceuticals that have not been included in any collection, e.g. the ethics of patients as researchers. In addition, it includes philosophical issues that are not within the traditional domain of applied ethics. For example, a game-theoretic approach to combating the emergence of antibiotic-resistant pathogens by spreading altruism. A tripartite distinction provides an organized series of discussions that shows the interrelatedness of philosophical issues from the creation of pharmaceuticals, the creation of demand for them through their delivery to their ultimate consumption.

Ballroom Biology: Recent Insights into Honey Bee Waggle Dance Communications Roger Schürch, Margaret J. Couvillon, Madeleine Beekman, 2016-03-02 The honey bee waggle dance communication is a complex, unique, at times controversial and ultimately fascinating behavior. In an elaborate figure of eight movement, a returning forager conveys the distance and direction from the hive to resources, usually the nectar and pollen that is their food, and it remains one of the most sophisticated known forms of non-human communication. Not surprisingly, since its discovery more than 60 years ago by Karl von Frisch, the dance has been subject to investigations that span from basic biology through human culture and neurophysiology to landscape ecology. Here we collate recent advances in our understanding of the dance.
