ORGANIZATION OF LIVING THINGS

SCIENCE IN FOCUS – BIODIVERSITY, EARLY

What Do You Understand About How Are Living Things Organized?

Living things are organized into different levels of organization. The levels of organization are: cell, tissue, organ, organ system, organism, population, community, ecosystem, and biosphere. Each level of organization has a specific function and is made up of different parts.

Cells are the basic units of life. They are made up of different parts and perform specific functions. Tissues are groups of similar cells that work together to perform a specific function. Organs are made up of different tissues that work together to perform a specific function. Organ systems are made up of different organs that work together to perform a specific function. Organisms are made up of different organ systems that work together to perform a specific function. Populations are made up of different organisms that live in the same area. Communities are made up of different populations that live in the same area. Ecosystems are made up of different communities that live in the same area. Biospheres are made up of different ecosystems that live in the same area.
