ENTREPRENEURSHIP AND SMALL BUSINESS Dr. Samir Kumar,2023-01-28 The Irish French economist Richard Cantillon initially coined the term entrepreneur from the French word *entrepreneur* which meaning to undertake It is generally agreed that the term entrepreneur was first used by the French economist Jean Baptiste Say sometime in the nineteenth century One who undertakes a business typically as a contractor serving as mediator between capital and labour according to his definition In recent years the concept of entrepreneurship has received a lot of research and discussion as more individuals come to appreciate the importance of small businesses to national economic development As a result of the widespread conviction that even a modestly successful startup has the potential to expand into a substantial enterprise developing nations have instituted regulations and tax incentives designed to foster the creation of such ventures Startup creation promotion and management are all components of entrepreneurship The term entrepreneur refers to a person who runs a business on their own rather than being employed by someone else Someone who is self employed manages their own company group or profession With this complicated topic in mind the chapter on entrepreneurship provides a sharp point of emphasis To create or extract value economically is the essence of entrepreneurship According to this definition

entrepreneurs are those who seek out new opportunities and are willing to take risks beyond those typically associated with launching a firm. An entrepreneur is someone who takes on the primary responsibility for starting up and running a firm as well as the majority of the financial risk. Entrepreneurship refers to the actions taken to establish a company. The entrepreneur is often credited with introducing novel products, services, and methods to the market. Entrepreneurship has been defined in more limited ways as the capacity and willingness to develop, organize, and manage a business venture along with any of its risks to make a profit or as the process of designing, launching, and running a new business, which is often similar to a small business. Entrepreneurs are the folks who come up with these company ideas. In spite of the fact that most definitions of entrepreneurship center on the creation and management of new firms, many new ventures fail due to lack of money, poor business choices, government regulations, an economic crisis, a lack of market demand, or a combination of all of these.
