Poland This conference is a continuation of a series of conferences on similar topics KOSYR organized each second year
since 1999 by the Chair of Systems and Computer Networks Wroclaw University of Technology An increasing interest to
those conferences paid not only by home but also by foreign participants inspired the organizers to transform them into
conferences of international range Our expectations that the community of specialists in computer recognizing systems will
find CORES 05 a proper form of maintaining the tradition of the former conferences have been confirmed by a large number
of submitted papers Alas organizational constraints caused a necessity to narrow the acceptance criteria so that only 100
papers have been finally included into the conference program The area covered by accepted papers is still very large and it
shows how vivacious is scientific activity in the domain of computer recognition methods and systems It contains various
theoretical approaches to the recognition problem based on mathematical statistics fuzzy sets morphological methods
wavelets syntactic methods genetic algorithms artificial neural networks ontological models etc Most attention is still paid to
visual objects recognition however acoustic textual and other objects are also considered Among application areas medical
problems are in majority recognition of faces speech signals and textual information processing methods being also
