

LESSON PLAN

Standard: CCSS.MATH.PRACTICE.HP1 Make sense of problems and persevere in solving them.
 CCSS.MATH.CONTENT.3-04.A.3
 Use multiplication and division within 100 to solve word problems in situations involving equal groups, arrays, and measurement quantities.

Objective: Students will show multiple models that support solving the same word problem.
 Students will be able to solve one step multiplication and division problems, write a corresponding equation, and illustrate their work by drawing models that support their thinking.

Materials Needed

Worksheet 2.1

Optional:

Worksheet 2.2, whiteboard, markers, counters.

Vocabulary

Equation

Array

Product

Quotient

Equal Groups

Tape Diagram

Structure / Activity

Whole Group: Teacher will elicit group thinking about how to solve problem, write equation, and draw model. Teacher will have students share work with various models to show multiple strategies for the same problem.

Independent: Students will complete problems independently or in pairs while teacher works with students who need additional support.

Questioning

What information does the problem tell us?
 What model makes the most sense to show this problem?

Can an array and equal groups show the same math thinking?

How can you connect the thinking in an array to equal groups?

Assessment

Exit Ticket Problem

(Students should complete this problem independently.)

Where Great Teaching Begins Anne R. Reeves, 2011-11-15 What comes to mind when you think about lesson planning If you re like most teachers you focus on the material you need to present what you will do and say what you will ask students to do and the assessments you will create and administer And if you re like most teachers you also know what it s like to be disappointed when this careful planning doesn t always lead to the deep understanding and mastery you d intended There s a better way to approach instructional design says author and teacher educator Ann R Reeves and it s within every teacher s grasp It begins with a simple mental shift from planning for activities to planning for learning outcomes and a critical concentration on learning objectives Remarkable for its clarity and filled with vivid examples *Where Great Teaching Begins* is a step by step walk through the crucial behind the scenes intellectual work necessary to make instruction truly effective and help students learn deeply and meaningfully Here you ll discover how to Translate even the most inscrutable standards into strong learning focused objectives Use effective objectives as the basis for excellent assessment Craft engaging learning activities that incorporate both targeted content and necessary thinking skills Pull objectives assessments and learning activities together into powerful plans for learning Whether you re a novice instructional designer or a veteran seeking a new streamlined process this book is a must read take on how to plan and achieve the excellent learning all teachers aim for and all students deserve *Lesson Study Research and Practice in Mathematics Education* Lynn C. Hart, Alice S. Alston, Aki Murata, 2011-01-11 Lesson study is a professional development process that teachers engage in to systematically examine their practice with the goal of becoming more effective Originating in Japan lesson study has gained significant momentum in the mathematics education community in recent years As a process for professional development lesson study became highly visible when it was proposed as a means of supporting the common practice of promoting better teaching by disseminating documents like standards benchmarks and nationally validated curricula While the body of knowledge about lesson study is growing it remains somewhat elusive and composed of discrete research endeavors As a new research area there is no coherent knowledge base yet This book will contribute to the field bringing the work of researchers and practitioners together to create a resource for extant work This

book describes several aspects of Lesson Study amongst others it gives an historical overview of the concept it addresses issues related to learning and teaching mathematics it looks at the role of the teacher in the process The last two sections of the book look at how lesson Study can be used with preservice mathematics teachers and at university mathematics methods teaching
