Phonics for Pupils with Special Educational Needs Book 7: Multisyllable Magic Ann Sullivan, 2018-10-11 Phonics for Pupils with Special Educational Needs is a complete structured multisensory programme for teaching reading and spelling making it fun and accessible for all. This fantastic seven part resource offers a refreshingly simple approach to the teaching of phonics alongside activities to develop auditory and visual perceptual skills. Specifically designed to meet the needs of pupils of any age with special educational needs, the books break down phonics into manageable core elements and provide a huge wealth of resources to support teachers in teaching reading and spelling. Book 7 Multisyllable Magic focuses on revising the main complex sounds from previous books and working on words with 2, 3 and 4 syllables. It also explores words with key suffixes: *tion, sion, ture, sure, cious, cial*. Each chapter contains 10 engaging activities including syllable jigsaw, sounds like a syllable, syllable trap and spelling challenge, plus handy highlighted word cards. Thorough guidance is provided on how to deliver each activity as well as a lesson planner template to support learning. Each book in the series gradually builds on children's understanding of sounds and letters and provides scaffolded support for children to learn about every sound in the English language. Offering tried and tested material which can be photocopied for each use, this is an invaluable resource to simplify phonics teaching for teachers and teaching assistants and provide fun new ways of learning phonics for all children. This book is accompanied by a companion resource Phonics for Pupils with Complex SEND to be used alongside the Phonics for Pupils with Special Educational Needs programme. The activities from Books 1-6 of the programme are adapted to be accessible for non-verbal pupils including AAC users and those with physical disabilities.

Allographs I Parent/Teacher Manual Diane McGuinness Ph.D, 2014-12-18 English is a compounding language in which root words are modified/changed in meaning by adding prefixes and suffixes. The rules of the spelling game change at this level and attention shifts to the syllable unit and spellings for prefixes and suffixes. This new knowledge makes a profound difference in reading and spelling skills and dramatically enhances reading comprehension and vocabulary. Lessons begin with simple compounding of common English words: *doghouse, sunset* and gradually build to include Latin and Greek based words up to six syllables in length. For example, *inform* (a verb) can be changed to a noun by adding the suffix *shun*, spelled *tion*, a suffix used in thousands of words. It has three common spellings: *information, aggression, optician*, and four rare ones. Once the student learns when these spellings are used, *cian* always marks an occupation; difficult words suddenly become easy to read and spell. Long, scary words like *determination* can be broken down to easily decodable units: *de, ter, min, a, tion*. Once these patterns are understood, students as young as eight years can learn to read and spell thousands of new words in just a few lessons. Allographs II Manual contains fifty-nine partially scripted lessons. Sample lessons for the higher levels of the code provide a platform for continuing development using the Student Workbook Dictionary. Both components are essential to teach this program effectively.

Early Reading Instruction Diane McGuinness, 2006-01-20 *Early Reading Instruction* is a comprehensive analysis of the research evidence from early writing systems to computer models of reading In this book Diane McGuinness provides an innovative solution to the reading war the century old debate over the efficacy of phonics sound based versus whole word meaning based methods She has developed a prototype a set of elements that are critical to the success of a reading method McGuinness shows that all writing systems without exception are based on a sound unit in the language This fact and other findings by paleographers provides a platform for the prototype Other elements of the prototype are based on modern research For example observational studies in the classroom show that time spent on three activities strongly predicts reading success learning phoneme symbol correspondences practice at blending and segmenting phonemes in words and copying writing words phrases and sentences Most so called literacy activities have no effect and some like sight word memorization have a strongly negative effect The National Reading Panel 2000 summarized the research on reading methods after screening out thousands of studies that failed to meet minimum scientific standards In an in depth analysis of this evidence McGuinness shows that the most successful methods children reading a year or more above age norms include all the elements in the prototype Finally she argues because phonics type methods are consistently shown to be superior to whole word methods in studies dating back to the 1960s it makes no sense to continue this line of research The most urgent question for future research is how to get the most effective phonics programs into the classroom

Allographs II Teacher/Parent Manual Diane McGuinness Ph.D., 2014-12-18 *Allographs* *Allographs* is a revolutionary spelling program based on new discoveries about the structure of the English writing system Research by the author has revealed that about 90% of words in print are represented by 176 spellings When these spellings are taught in an orderly way consistent with the logic of an alphabet code students of any age can learn to read and spell with relative ease *Allographs* lessons are partially scripted and no special training is required to teach this program Lessons are designed to work for all ages and in any setting ranging from home tutoring to the classroom Lessons are set out in two programs *Allographs I* teaches spellings for common English words up to 3 syllables long It is designed for students with a reading
