child's mind and comprises three stages: the elementary school grammar stage when the building blocks of information are absorbed through memorization and rules; the middle school logic stage in which the student begins to think more analytically; and the high school rhetoric stage where the student learns to write and speak with force and originality. Using this theory as your model, you'll be able to instruct your child whether full time or as a supplement to classroom education in all levels of reading, writing, history, geography, mathematics, science, foreign languages, rhetoric, logic, art, and music regardless of your own aptitude in those subjects. A new optional Resource Recommendations Portal provides subscribers with curated lists of the best curricula for every grade level and learning style. Thousands of parents have already used the methods described in *The Well Trained Mind* to create a truly superior education for children in their care. Teaching Music Appreciation Online Bethanie L. Hansen, 2020. In this book, readers will learn practical tips and strategies to teach music appreciation online. As online education is a growing field, an increasing number of teachers trained in traditional live methods find themselves now teaching online and potentially without mentors to assist them. Students are also changing, seeking highly engaged, relevant, and interactive learning opportunities that connect to their lives. Here, readers will find helpful guidance in planning curriculum, integrating multimedia assets, designing forum discussions, developing assignments, preparing rubrics, engaging in forum discussions, preparing managing and teaching the course, providing feedback and grading, and following up with struggling and challenging students. The book can serve as a resource to those already teaching music appreciation online or as a comprehensive guide to those new to the field.

Additionally, it may serve as a resource to instructors in other disciplines who seek to shift live courses to the online format, as well as music appreciation instructors who would like to integrate digital or online components into traditional face-to-face courses. The book is organized into five major sections designed to guide the novice online educator in depth while also appealing to the seasoned veteran through the ability to review each section as a stand-alone resource. Although some readers will desire to read from cover to cover, they will also be able to move in a non-linear manner from chapter to chapter using chapters in modular form in order to benefit from the sections that most apply to them at any given time.
