English Word-Formation Laurie Bauer, 1983 Although the illustrative material is drawn principally from English general points are illustrated with a variety of languages to provide a new perspective on a confused and often controversial field of study
Reflections on English Word-Formation Laurie Bauer, 2025-08-31 We are all familiar with coming across a new word whether it has just been invented or whether we have just not met it before How do we invent new words How do we understand words that we have never heard before What are the limits on the kinds of words we produce How have linguists and grammarians dealt with the phenomenon of creating new words and how justified are their ways of viewing such words In this concise and compelling book Professor Bauer one of the world's best known morphologists looks back over fifty years of his work seeking out overlooked patterns in word formation and offering new solutions to recurrent problems Each section deals with a different morphological problem meaning that the book can either be read from start to finish or alternatively used as a concise reference work on the key issues and problems in the field

Creative Compounding in English Réka Benczes, 2006-01-01 Metaphorical and metonymical compounds novel and lexicalised ones alike are remarkably abundant in language Yet how can we be sure that when using an expression such as land fishing in order to speak about metal detecting the referent will be immediately understood even if the hearer had not been previously familiar with the compound Accordingly this book sets out to explore whether the semantics of metaphorical and metonymical noun noun combinations can be systematically analysed within a theoretical framework where systematicity pertains to regularities in both the cognitive processes and the products of these processes that is the compounds themselves Backed up by recent psycholinguistic evidence the book convincingly demonstrates that such compounds are not semantically opaque as it has been formerly claimed they can in fact be analysed and accounted for within a cognitive linguistic framework by the combined application of metaphor metonymy blending profile determinacy and schema theory and represent the creative and associative word formation processes that we regularly apply in everyday language
