FM'99 - Formal Methods Jeannette M. Wing, Jim Woodcock, Jim Davies, 2003-07-31 Formal methods are coming of age. Mathematical techniques and tools are now regarded as an important part of the development process in a wide range of industrial and governmental organisations. A transfer of technology into the mainstream of systems development is slowly but surely taking place. FM 99 the First World Congress on Formal Methods in the Development of Computing Systems is a result and a measure of this new found maturity. It brings an impressive array of industrial and applications oriented papers that show how formal methods have been used to tackle real problems. These proceedings are a record of the technical symposium of FM 99 also side the papers describing applications of formal methods you will find technical reports papers and abstracts detailing new advances in formal techniques from mathematical foundations to practical tools. The World Congress is the successor to the four Formal Methods Europe Symposia which in turn succeeded the four VDM Europe Symposia. This session reflects an increasing openness within the international community of researchers and practitioners. Papers were submitted covering a wide variety of formal methods and application areas. The programme committee reflects the Congress's international nature with a membership of 84 leading researchers from 38 different countries. The committee was divided into 19 tracks each with its own chair to oversee the reviewing process.
