Teaching Ethics Across the Management Curriculum Kemi Ogunyemi, 2014-12-17 The chief executive officer CEO of a corporation and his or her executive team are responsible for the management of the business and its continued operating and financial success The CEO and executive team are almost always highly compensated and the relative total compensation has mushroomed over time Most of the compensation now is designed to be performance based but leading to charges that executives have incentives to manipulate corporate earnings and stock price in the short term for their own self interests The compensation at some companies became so egregious that compensation again became a major public policy issue subject

to federal regulation Executive Compensation focuses on the major topics related to executive compensation present past and future First is understanding what executive compensation is including composition and objectives of pay contracts Second how do specific compensation agreements affect corporate behavior and performance Third what are the major components including how and what are accounted for and disclosed How is compensation especially executive compensation accounted for that is what are the calculations and journal entries required Fourth what does historical analysis tell us about the topic especially how contractual decisions have been made and what has worked Finally what is in store for the future both expected compensation agreements and what the compensation incentives suggest for future corporate decisions on operations and accounting manipulation

Harmonious Technology Pak-Hang Wong, Tom Wang, 2021-02-25 Technology has become a major subject of philosophical ethical reflection in recent years as the novelty and disruptiveness of technology confront us with new possibilities and unprecedented outcomes as well as fundamental changes to our normal ways of living that demand deep reflection of technology However philosophical and ethical analysis of technology has until recently drawn primarily from the Western philosophical and ethical traditions and philosophers and scholars of technology discuss the potential contribution of non Western approaches only sparingly Given the global nature of technology however there is an urgent need for multiculturalism in philosophy and ethics of technology that include non Western perspectives in our thinking about technology While there is an increased attention to non Western philosophy in the field there are few systematic attempts to articulate different approaches to the ethics of technology based on other philosophical and ethical traditions The present edited volume picks up the task of diversifying the ethics of technology by exploring the possibility of Confucian ethics of technology In the six chapters of this volume the authors examine various ideas concepts and theories in Confucianism and apply them to the ethical challenges of technology in the epilogue the editors review the key ideas articulated throughout the volume to identify possible ways forward for Confucian ethics of technology *Harmonious Technology* revives Confucianism for philosophical and ethical analysis of technology and presents Confucian ethics of technology as another approach to the ethics of technology It will be essential for philosophers and ethicists of technology who are urged to consider beyond the Western paradigms More broadly the volume will be of interest to students and scholars in the fields of philosophy science and technology studies innovation studies political science and social studies

Identity Excellence Perry L. Glanzer, 2022-07-18 American higher education historically and inherently is a morally formative endeavor Yet in order to respond to America's moral pluralism higher education has increasingly taken a reductionistic approach to moral formation Consequently it abandoned the effort to supply students with moral expertise Current approaches help students learn how to be excellent professionals and citizens but they fail to provide the necessary tools for living the good life in college and beyond **Identity Excellence A Theory of Moral Expertise for Higher Education** addresses this problem by setting forth a multi disciplinary theory of moral expertise for fostering moral excellence in an array of important identities To this end it teases apart the essential elements of what it means to be excellent in an identity before discussing the philosophical sociological psychological and educational processes necessary for students to internalize traditions of identity excellence as part of their own moral identities Overall the emergent theory exposes the shortcomings

in contemporary general education professional ethics and co curricular education Finally this book sets forth a bold but compelling vision for a more hopeful future for American higher education As outlined within such education involves teaching students excellence in the Great Identities as well as how to prioritize and integrate their pursuit of identity excellence

Methods of IT Project Management, Fourth Edition Jeffrey L. Brewer,Kevin C. Dittman,2022-10-15 Designed for graduate advanced undergraduate and practitioner project management courses with an information technology focus Methods of IT Project

Management is designed around the Project Management Body of Knowledge PMBOK incorporating material from the latest seventh edition while still maintaining the book's process approach. The text provides students with all the concepts, techniques, artifacts, and methods found in the leading project management reference books and modern development methodologies, agile, hybrid, and traditional, while also conveying practical knowledge that can immediately be applied in real world settings. Unlike other books in this area, the material is organized according to the sequence of a generic project life cycle from project selection to initiation, planning, execution, control, and iteration, or project closeout. Following this life cycle approach, as opposed to covering the material by knowledge area or project performance domain, allows new learners to simultaneously study project management concepts and methods as they develop skills they can use immediately during and upon completion of the course. The text's structure also allows different programs to use the book during real world student projects.

Ethical Dilemmas in the Creative, Cultural and Service Industries Johan Bouwer, 2019-05-22. *Ethical Dilemmas in the Creative Cultural and Service Industries* enhances professional ethical awareness and supports students' development of skills for ethical decision making in these growing sectors. It focusses on the shaping of personal and professional values and dealing with the moral and ethical issues that future professionals may encounter in practice. Including a multitude of varied and interdisciplinary case studies, this textbook adopts an applied ethical approach which enables the student to combine basic ethical theory with relevant and real life cases. Major ethical issues such as CSR, ethical leadership, human rights, fraud, employee rights and duties, new technology, and social entrepreneurship are addressed. This will be invaluable reading for students studying tourism, hospitality, leisure, events, marketing, healthcare, logistics, retail, and game development. It will also be a suitable resource for in-company training of practitioners already working in this wide range of domains.

The Fourth Civilization, Volume Two Rick Sutcliffe, 2024-12-05. *The Fourth Civilization: Technology, Society, and Ethics* stimulates its readers to consider the ethical and societal consequences of technologies they already use and others that will become ubiquitous. Its discussions and provocative questions integrate history, science, technology, and ethical and religious beliefs, examining the past and present and preparing for the future. Social changes always follow the adoption of new technologies. The plow drove the transition from hunter-gatherer to agrarian society, and the steam engine began the Industrial Revolution. Computing technology now ushers in an Information Age. What does ethical decision making look like in a time of rapid transition and beyond? What will society be like once things stabilize in a Fourth Civilization, if indeed they will? How will robots, artificial intelligence, factory automation, and self-driving vehicles affect daily life and work? Discussions about ideas were not common in an era of specialist technicians. They are becoming necessary and routine in a fast-changing and more broadly integrative world, and this book attempts to practice what it preaches. Let it inform, provoke, and become a part of New Renaissance literature, inspiring its readers to become ethically informed New Renaissance people in the Fourth Civilization information age.
