Textuality and Knowledge Peter Shillingsburg, 2017-06-09 In literary investigation all evidence is textual dependent on preservation in material copies Copies however are vulnerable to inadvertent and purposeful change In this volume Peter Shillingsburg explores the implications of this central concept of textual scholarship Through thirteen essays Shillingsburg argues that literary study depends on documents the preservation of works and textual replication and he traces how this proposition affects understanding He explains the consequences of textual knowledge and ignorance in teaching reading and research and in the generous impulses behind the digitization of cultural documents He also examines the ways in which facile assumptions about a text can lead one astray discusses how differing international and cultural understandings of the importance of documents and their preservation shape both knowledge about and replication of works and assesses the dissemination of information in the context of ethics and social justice In bringing these wide ranging pieces together Shillingsburg reveals how and why meaning changes with each successive rendering of a work the value in viewing each subsequent copy of a text as an original entity and the relationship between textuality and knowledge Featuring case studies throughout this erudite collection distills decades of Shillingsburg's thought on literary history and criticism and appraises the place of textual studies and scholarly editing today

The Void ,2007-10-25 What is the void What remains when you take all the matter away Can empty space nothing exist This little book explores the science and the history of the elusive void from Aristotle who insisted that the vacuum was impossible via the theories of Newton and Einstein to our very latest discoveries and why they can tell us extraordinary things about the cosmos Frank Close tells the story of how scientists have explored the elusive void and the rich discoveries

that they have made there He takes the reader on a lively and accessible history through ancient ideas and cultural superstitions to the frontiers of current research He describes how scientists discovered that the vacuum is filled with fields how Newton Mach and Einstein grappled with the nature of space and time and how the mysterious aether that was long ago supposed to permeate the void may now be making a comeback with the latest research into the Higgs field We now know that the vacuum is far from being nothing it seethes with virtual particles and antiparticles that erupt spontaneously into being and it also may contain hidden dimensions that we were previously unaware of These new discoveries may provide answers to some of cosmology's most fundamental questions what lies outside the universe and if there was once nothing then how did the universe begin

Spiritualism and Phenomenology Emmanuel Falque,2025-04-08 The conflict between spiritualism and phenomenology will no longer take place Better it is through their encounter and their backlash that a new fruitfulness for thought will develop The case of Maine de Biran thus comes to exemplify a new beginning à la française for metaphysics on the one hand and for phenomenology on the other But the philosopher from Bergerac in the Dordogne is most often read according to his explicit meaning and not his implicit one He is supposedly the thinker of freedom and consciousness spiritualism or of the inner self and the lived body phenomenology But these readings forget the exceptions to the primitive fact of internal effort illness sleep sleepwalking madness the body object the outer self which mark Biran's oeuvre as one of the summits of a thought that escapes phenomenality and confers a real consistency upon corporeality A new Columbus of metaphysics as he himself names himself Maine de Biran read otherwise initiates for today a new beginning for thought

religious differences of ever more violent fervor Ideas of Liberty in Early Modern Europe argues that this turbulent age also laid the conceptual foundations of our modern ideas about liberty justice and democracy Hilary Gatti shows how these ideas emerged in response to the often violent entrenchment of monarchical power and the fragmentation of religious authority against the backdrop of the westward advance of Islam and the discovery of the New World She looks at Machiavelli s defense of republican political liberty and traces how liberty became intertwined with free will and religious pluralism in the writings of Luther Erasmus Jean Bodin and Giordano Bruno She examines how the St Bartholomew s Day Massacre and the clash of science and religion gave rise to concepts of liberty as freedom of thought and expression Returning to Machiavelli and moving on to Jacques Auguste de Thou Paolo Sarpi and Milton Gatti delves into debates about the roles of parliamentary government and a free press in guaranteeing liberties Drawing on a breadth of canonical and lesser known writings Ideas of Liberty in Early Modern Europe reveals how an era stricken by war and injustice gave birth to a more enlightened world
