

## Grade K-2 Teacher's Guide

**Title – I Am One Person, and I Can Make a Difference!**

**Subtitle – What Can One Person Do to Help Slow Climate Change?**

**Subject – Science**

**Grade Level – K-2**

**Objectives – To raise students' awareness of how our daily activities and climate change are linked, and to illustrate the effects of climate change on one animal in particular – the polar bear.**

### **Materials**

Earth Hour video (not essential but a very good tool); Web link – [www.earthhour.org](http://www.earthhour.org)

Activity Sheets – downloadable

Scissors and glue

### **Introduction**

Climate change is perhaps the most important problem facing our planet today. We are seeing that the Earth is rapidly heating up. We are beginning to see dramatic changes – from melting glaciers to stronger hurricanes. Polar bears are at risk, as well as life all around the planet, from tigers and coral reefs to plankton and people. To alter the current course of climate change we must act now. Let's look at how our daily activities, including using electricity and driving cars, can affect the future of our planet and one animal in particular, the polar bear.

**Earth Hour Video:** If you have a class computer with Web access, show the Earth Hour video before handing out activity sheets. This is not essential but a very helpful tool to describe the effects of climate change.

### **Activity Sheet One – I am one person, and I can make a difference!**

Climate change, greenhouse gases and fossil fuels can be extremely difficult ideas for young students to understand. We want to simply introduce young children to climate change and how it can affect the world around us.

Here are some suggested open-ended questions to ask while students are doing this activity sheet:

-Has anyone ever eaten too much candy or cake and gotten a stomachache or not felt so good?

Do too much of something you like can be unhealthy, right?

-Did you know that when we drive too much or use too much electricity it can be unhealthy for our planet?

-Has anyone heard about climate change? Do you know what it is?

Did you know that if we drive too much or use too much electricity it can cause the climate to change and the planet can slowly get warmer?

-Are climate change and the warming of the planet bad?

It can change the weather, causing stronger hurricanes and more storms.

Some farmers may not get enough rain to grow their crops, that is called a drought.

Animals like the polar bear may find it hard to find food.

How can you be helpful, save energy and keep our planet healthy? Examples:

Turn off the light when you leave a room.

Take a shorter shower.

### **Activity Sheet Two – How Do You Use Energy?**

This worksheet offers pictures of some of the things that use energy in our daily lives. Have the children think of three more things that use energy. Then have the children cut along the dotted lines of the worksheet.

### **Activity Sheet Three – You and Your Family Can Make a Difference!**

Have the students paste one picture at a time onto the activity sheet in the correct place. Read how they can conserve with this object. Example: "Everyone pick the picture of the television. How can you save? Turn it off when you are not watching it."

### **Activity Sheet Four – Polar Bears Are Threatened!**

A maze illustrating the effect global warming can have on the polar bear. How can we avoid pushing more animals like the polar bear towards extinction?

### **Classroom Activity Sheet – What is Earth Hour?**

This worksheet explains Earth Hour and gives the students a chance to sign a class pledge to participate.
