## What is a case study?

A case study is an individual's story. It tells the reader how Save the Children's work has made a difference in the life of a child or his/her family.

### 1. Background: Please provide basic information about the interviewee(s).

Name(s), gender, age:	Mama Amina a Female aged 25 years
Location – village/town, district/province and country:	Mama Amina is a resident of Arbanqeramso location of wajir east constituency in Wajir County Northern Kenya.
Keywords – themes:	BEHAVIOUR CHANGE COMMUNICATION

### 2. Summary: Please describe the interviewee's day-to-day life and environment.

Amina hails from a very insolvent family which has put them in an abject situation and the kind of life they are living can't be compared to that of their neighbours since they never owned a source of wealth. She came to settle in Arbaqheramso in 2011 during the prolonged Horn of Africa drought that swept away their livestock. Her husband is a small scale herder and most of the time is absent from home looking after other people's shoats. They live in a small makeshift home.

### 3. The story: Interviewee's story in his or her own words. Please use exact words with direct quotes.

Amina who is a mother of two boys and one girl, is among the beneficiaries of the County Department of Health (CDH) and Save the Children Health and Nutrition integrated interventions as well as a member of a Mother to Mother Support Group (MTMSG) who has attended several health and nutrition promotion sessions and short trainings such as Participatory Hygiene and sanitation transformation (PHAST), Community Led Total sanitation (CLTS) and others that stimulated her mind to realize the importance of hygiene and sanitation as a preventive measure. She said, "I have been part of the communities triggered by Sub-County public health officers together with Save the Children staff and I feel that there is need to change." She said, "Our source of water is a shallow well and when it rains it usually floods and fills with water to the brim. However, we have been consuming the water without boiling thus our children and us becomes sick due to unhygienic conditions. My gratitude goes to Save the Children and the Health Department who have used their time and resources to empower us at the grass root level." Immediately after CLTS triggering in October 2014, Amina started to construct a pit latrine in her compound as she vowed never to go back to open defecation. On the completion of the latrine Amina welcomed her neighbours to share with her with no string attached to it but exhort them to construct one to elude slavery and advocate for Open Defaecation Free environment (ODF).

*"Hooran kathitha ayaan isku ceelin jiray muusqull laan awgeed ,gumeerka ayaana eehanunu jiray waxana kacabsan jiray cuuthur kathitha xageed inn uu igudacaa lakkiin xada waan reystay maarkan musqushi distaay"* Amina retorts. ("Used to retain urine in my bladder for long hours due to lack of toilet and I had put myself in the risk of getting Urinary Tract Infections(UTIs) but now I am relieved since I own a personal latrine" she also said that *'Niin cessantisa ayaa ceelgeysa'*" It is only your belongings that can quench your thirst")

**Understanding Case Study Research** Malcolm Tight, 2017-01-26 Written in an accessible and jargon free style this book provides a comprehensive student friendly guide to the nature and use of case study research Whether as part of a more substantial study or as the foundation for a self contained smaller project case studies provide viable and valuable alternatives to conducting large scale research Grounded in both theory and practice this book sets out not only the key debates and ethical issues surrounding case study research but also focuses specifically on the work of others and how you can understand use and write about secondary data as the basis for your own research project With tips examples and extensive discussion of real world case studies from a variety of social science and other disciplines Tight illustrates the kinds of research to which case studies can be applied Topics include Types of case studies Advantages and disadvantages to using case studies The meaning and value of case study research The use of case studies in different disciplines and research designs Whether you want to know how to access and use the case studies of others or understand the methods behind conducting your own case study research this book will take you through every step of the process **Encyclopedia of Case Study Research** Albert J. Mills, Gabrielle Durepos, Elden Wiebe, 2010 This is the authoritative reference work in the field An interdisciplinary set it investigates the extensive history design and methods of case study research **Case Study Evaluations**, 1990 Atlantida, a Case Study in Household Sample Surveys United States. International Statistical Programs Office, 1966 **Quality Research Papers** Nancy Jean Vyhmeister, Terry Dwain Robertson, 2020-05-19 This will be the fourth edition of a time tested resource for students writing papers in the fields of religion and theology It provides essential guidance for writing assignments typical in graduate programs in religion and has served as a standard textbook for seminary research courses The fourth edition is updated to include information on Turabian 9th edition SBL Handbook 2nd edition new resource lists and additional help with online resources and formatting issues Most importantly this new edition is revised from the perspective of information abundance rather than information scarcity Today's research mindset has shifted from find anything and be satisfied with anything to choose intentionally reliable and credible sources Quality Research Papers will guide students through an overabundance of online and library resources and help them craft excellent essays *Beyond open access: visions for open evaluation of scientific papers by post-publication peer review* Nikolaus Kriegeskorte, Diana Deca, A scientific publication system needs to provide two basic

services access and evaluation The traditional publication system restricts the access to papers by requiring payment and it restricts the evaluation of papers by relying on just 2-4 pre-publication peer reviews and by keeping the reviews secret As a result the current system suffers from a lack of quality and transparency of the peer review evaluation process and the only immediately available indication of a new paper's quality is the prestige of the journal it appeared in Open access is now widely accepted as desirable and is slowly beginning to become a reality However the second essential element evaluation has received less attention Open evaluation an ongoing post-publication process of transparent peer review and rating of papers promises to address the problems of the current system However it is unclear how exactly such a system should be designed The evaluation system steers the attention of the scientific community and thus the very course of science For better or worse the most visible papers determine the direction of each field and guide funding and public policy decisions Evaluation therefore is at the heart of the entire endeavor of science As the number of scientific publications explodes evaluation and selection will only gain importance A grand challenge of our time therefore is to design the future system by which we evaluate papers and decide which ones deserve broad attention So far scientists have left the design of the evaluation process to journals and publishing companies However the steering mechanism of science should be designed by scientists The cognitive computational and brain sciences are best prepared to take on this task which will involve social and psychological considerations software design and modeling of the network of scientific papers and their interrelationships This Research Topic in Frontiers in Computational Neuroscience collects visions for a future system of open evaluation Because critical arguments about the current system abound these papers will focus on constructive ideas and comprehensive designs for open evaluation systems Design decisions include Should the reviews and ratings be entirely transparent or should some aspects be kept secret Should other information such as paper downloads be included in the evaluation How can scientific objectivity be strengthened and political motivations weakened in the future system Should the system include signed and authenticated reviews and ratings Should the evaluation be an ongoing process such that promising papers are more deeply evaluated How can we bring science and statistics to the evaluation process e.g. should rating averages come with error bars How should the evaluative information about each paper e.g. peer ratings be combined to prioritize the literature Should different individuals and organizations be able to define their own evaluation formulae e.g. weighting ratings according to different criteria How can we efficiently transition toward the future system Ideally the future system will derive its authority from a scientific literature on community-based open evaluation We hope that these papers will provide a starting point

**The SAGE Handbook of Qualitative Research Design** Uwe Flick, 2022-03-17 Qualitative research design is continually evolving It is not only more established in disciplines beyond the traditional social sciences in which it is a standard choice but also just as impacted by the changes in what data technologies and approaches researchers are using This Handbook takes readers through the foundational theories functions strategies and approaches to qualitative

research design before showcasing how it negotiates different data and research environments and produces credible actionable impact beyond the study. Containing contributions from over 90 top scholars from a range of social science disciplines, this Handbook is not just an anthology of different qualitative research designs and how when to use them; it is a complete exploration of how and why these designs are shaped and how why and into what they are evolving. This is a valuable resource for Master's and PhD level students, faculty members and researchers across a wide range of disciplines such as health, nursing, psychology, social work, sociology and education.

**Volume One: Part I: Concepts of Designing Designs in Qualitative Research; Part 2: Theories and Epistemological Contexts of Designing Qualitative Research; Part 3: Elements of Designing Qualitative Research; Part 4: Basic Designs and Research Strategies in Qualitative Research; Part 5: Mixing Methods in Designing Qualitative Research.**

**Volume Two: Part 6: Designing Qualitative Research for Specific Kinds of Data; Part 7: Designing Qualitative Online and Multimodal Research; Part 8: Designing Qualitative Research for Specific Groups and Areas; Part 9: Designing Qualitative Research in Disciplinary Fields; Part 10: Designing Qualitative Research for Impact.**

**Case Study Research in Practice** Helen Simons, 2009-06-05. Case Study Research in Practice explores the theory and practice of case study research. Helen Simons draws on her extensive experience of teaching and conducting case study to provide a comprehensive and practical account of how to design, conduct and communicate case study research. It addresses questions often raised by students and common misconceptions about case research. In four sections, the book covers: Rationale, concept and design of case study research; Methods, ethics and reflexivity in case study; Interpreting, analyzing and reporting the case; Generalizing and theorizing in case study research. Rich with tales from the field and summary memos as an aide memoire to future action, the book provides fresh insights and challenges for researchers to guide their practice of case study research. This is an ideal text for those studying and conducting case study research in education, health and social care and related social science disciplines. Helen Simons is Professor Emeritus of Education, University of Southampton.

*Environmental Studies and Disaster Management Case Study Based Approach: As per the NEP 2020 Model Syllabus | 600 Model Questions with Answers* Dr Dhirendra Kumar Sarangi, Dr Siba Prasad Mohanty, Dr Srikanta Jena, Dr Purnendu Kumar Das, Environmental Studies and Disaster Management is written strictly in accordance with the National Education Policy 2020. It follows a case study based approach and topically deals with the Multidisciplinary Nature of Environmental Studies, Natural Resources, Disaster Management, Social Issues and the Environment. Also, Unit V comprises Field Work which captures numerous studies on the subject. The chapter end questions divided into four parts contain close to 600 questions for practice.

**Combining Case Study Designs for Theory Building** Lakshmi Balachandran Nair, Michael Gibbert, Bareerah Hafeez Hoorani, 2023-02-09. Case study research is a versatile approach that allows for different data sources to be combined with its main purpose being theory development. This book goes a step further by combining different case study research designs informed by the authors' extensive teaching and research experience. It provides an accessible introduction to case study

research familiarizes readers with different archetypal and sequenced designs and describes these designs and their components using both real and fictional examples It provides thought provoking exercises and in doing so prepares the reader to design their own case study in a way that suits the research objective Written for an academic audience this book is useful for students their supervisors and professors and ultimately any researcher who intends to use or is already using the case study approach *A Case Study for Computer Ethics in Context* Michael James Heron,Pauline Helen

Belford,2024-03-29 Aimed at addressing the difficulties associated with teaching often abstract elements of technical ethics this book is an extended fictional case study into the complexities of technology and social structures in complex organizations Within this case study an accidental discovery reveals that the algorithms of Professor John Blackbriar are not quite what they were purported to be Over the course of 14 newspaper articles a nebula of professional malpractice and ethical compromise is revealed ultimately destroying the career of a prominent successful academic The case study touches on many topics relevant to ethics and professional conduct in computer science and on the social structures within which computer science functions Themes range from the growing influence of generative AI to the difficulties in explaining complex technical processes to a general audience also touching on the environmental consequences of blockchain technology and the disproportionate gender impacts of Coronavirus Each new revelation in the case study unveils further layers of complexity and compromise leading to new technical and social issues that need to be addressed Directly aimed at making ethics in the digital age accessible through the use of real world examples this book appeals to computer science students at all levels of the educational system as well as making an excellent accompaniment to lecturers and course convenors alike **Metadiscursive Nouns** Feng (Kevin) Jiang,2022-06-23 Based on a 1 7 million word corpus of 160

research articles from both soft and hard knowledge fields this book sets out to explore how a particular type of noun namely the metadiscursive noun is rhetorically used to mediate writer reader interaction in disciplinary writing Analysts of academic discourse have come to regard hedges reporting verbs directives and so on as forming part of a wide repertoire of interactive features available to authors suggesting a variety of terms including evaluation stance appraisal and metadiscourse One aspect which has been less fully explored however is the rhetorical role nouns play in achieving writers persuasive goals This book fills the gap by proposing a particular type of nouns as metadiscursive nouns as in this supports our hypotheses that youth are more likely to co offend when neighbourhoods are less disadvantaged The author aims to find out how writers employ metadiscursive nouns to engage and interact with readers in academic prose raising theoretical and pedagogical implications and how they can be applied in the teaching of academic writing This book will be of particular interest to students and scholars working in the areas of English for academic purposes corpus studies academic writing and linguistics in general *Drivers of Mangrove Forest Change and its Effects on Biodiversity and Ecosystem Services* Jennifer
