Exampler For Life Sciences 2014:

Exemplars, Imitation, and Character Formation Eric Yang, 2024-08-22 This volume examines the role and relevance of exemplars and the practice of imitation in character development and formation While the role of exemplars and imitation in spiritual and moral formation has been an integral part of many religious and wisdom traditions in recent times there has been limited theological and philosophical investigation into it and a dearth of interdisciplinary discussion The book brings together relevant research and insights from leading experts within philosophy psychology and theology with a slight emphasis on Christian approaches to exemplars and imitation especially given the reflection on these themes throughout the history of the Christian intellectual and mystical tradition Many of the contributions display an interdisciplinary approach into these issues hence this volume will be of interest to philosophers psychologists theologians and others who work in moral psychology and character formation

Designing Effective Feedback Processes in Higher Education Naomi Winstone, David Carless, 2019-06-27 Feedback is one of the most powerful influences on student achievement yet it is difficult to implement productively within the constraints of a mass higher education system *Designing Effective Feedback Processes in Higher Education A Learning Focused Approach* addresses the challenges of developing effective feedback processes in higher education combining theory and practice to equip and empower educators It places less emphasis on what teachers do in terms of providing commentary and more emphasis on how students generate make sense of and use feedback for ongoing improvement Including discussions on promoting student engagement with feedback technology enabled feedback and effective peer feedback this book Contributes to the theory and practice of feedback in higher education by showcasing new paradigm feedback thinking focused on dialogue and student uptake Synthesises the evidence for effective feedback practice Provides contextualised examples of successful innovative feedback designs analysed in relation to relevant literature Highlights the importance of staff and student feedback literacy in developing productive feedback partnerships Supports higher education teachers in further developing their feedback practice *Designing Effective Feedback Processes in Higher Education A Learning Focused Approach* contributes to the theory and practice of higher education pedagogy by re evaluating how feedback processes are designed and managed It is a must read for educators researchers and academic developers in higher education who will benefit from a guide to feedback research and practice that addresses well recognised challenges in relation to assessment and feedback

Isotopic Landscapes in Bioarchaeology Gisela Grupe,George C. McGlynn,2016-03-10 This work takes a critical look at the current concept of isotopic landscapes isoscapes in bioarchaeology and its application in future research It specifically addresses the research potential of cremated finds a somewhat neglected bioarchaeological substrate resulting primarily from the inherent osteological challenges and complex mineralogy associated with it In addition for the first time data mining methods are applied The chapters are the outcome of an international workshop sponsored by the German Science Foundation and the Centre of Advanced Studies at the Ludwig Maximilian University in Munich Isotopic landscapes are indispensable tracers for the monitoring of the flow of matter through geo ecological systems since they comprise existing temporally and spatially defined stable isotopic patterns found in geological and ecological samples Analyses of stable isotopes of the elements nitrogen carbon oxygen strontium and lead are routinely utilized in bioarchaeology to reconstruct biodiversity palaeodiet palaeoecology palaeoclimate migration and trade The interpretive power of stable isotopic ratios depends not only on firm testable hypotheses but most importantly on the cooperative networking of scientists from both natural and social sciences Application of multi isotopic tracers generates isotopic patterns with multiple dimensions which accurately characterize a find but can only be interpreted by use of modern data mining methods

Trends in Teaching Experimentation in the Life Sciences Nancy J. Pelaez,Stephanie M. Gardner,Trevor R. Anderson,2022-05-11 This book is a guide for educators on how to develop and evaluate evidence based strategies for teaching biological experimentation to thereby improve existing and develop new curricula It unveils the flawed assumptions made at the classroom department and institutional level about what students are learning and what help they might need to develop competence in biological experimentation Specific case studies illustrate a comprehensive

list of key scientific competencies that unpack what it means to be a competent experimental life scientist It includes explicit evidence based guidelines for educators regarding the teaching learning and assessment of biological research competencies The book also provides practical teacher guides and exemplars of assignments and assessments It contains a complete analysis of the variety of tools developed thus far to assess learning in this domain This book contributes to the growth of public understanding of biological issues including scientific literacy and the crucial importance of evidence based decision making around public policy It will be beneficial to life science instructors biology education researchers and science administrators who aim to improve teaching in life science departments Chapters 6 12 14 and 22 are available open access under a Creative Commons Attribution 4 0 International License via link [springer.com](https://www.springer.com)

Religion and Family Life Richard J. Petts, 2019-05-03 There has been increased interest among scholars in recent decades focused on the intersection of family and religion Yet there is still much that is not well understood in this area This

aim of this special issue is to further explore the influence of religion on family life. In particular, this issue includes a collection of studies from leading scholars on religion and family life that focus on ways in which religion and spirituality may influence various aspects of family life, including family processes, family structure, family formation, family dissolution, parenting, and family relationships. The studies included incorporate both qualitative and quantitative analyses, incorporate a number of different religious traditions, focus on religiosity among both adults and youth, and explore a number of important issues such as depression, intimacy, sexual behavior, lying, divorce, and faith transmission.

Handbook of Regional Growth and Development Theories Roberta Capello, Peter Nijkamp, 2019. Regional economics, an established discipline for several decades, has undergone a period of rapid change in the last ten years, resulting in the emergence of several new perspectives. At the same time, the methodology of regional economics has also experienced some surprising developments. This fully revised and updated Handbook brings together contributions looking at new pathways in regional economics, written by many well-known international scholars. The aim is to present the most cutting-edge theories explaining regional growth and local development. The authors highlight the recent advances in theories, the normative potentialities of these theories, and the cross-fertilization of ideas between regional and mainstream economists. It will be an essential source of reference and information for both scholars and students in the field.

Quantitative Methods for Place-Based Innovation Policy Roberta Capello, Alexander Kleibrink, Monika Matusiak, 2020-07-31. Place-based innovation policy design requires an in-depth understanding of territories and their complexity. Traditional statistics, with a lack of publicly available data at the disaggregated sub-sectoral and regional level, often do not provide adequate information. Therefore, new methods and approaches are required so that scientists and experts can inform decision makers and stakeholders in choosing priorities and directions for their innovation strategies. The book replies to such a need by offering advanced mapping methodologies for innovation policies, with a special focus on approaches that take into account place-based policies.

The Scientific Imagination Arnon Levy, Peter Godfrey-Smith, 2020. This book looks at the role of the imagination in science from both philosophical and psychological perspectives. These contributions combine to provide a comprehensive and exciting picture of this under-explored subject.

Categoriality and continuity in prosodic prominence Simon Roessig, 2020-09-08. Prosody has been characterised as a half-tamed savage, being shaped by both discrete categorical aspects as well as gradient continuous phenomena. This book is concerned with the relation of the wild and the tamed sides of prosodic prominence. It reviews problems that arise from a strict separation of categorical and continuous representations in models of phonetics and phonology, and it explores the potential role of descriptions aimed at reconciling the two domains. In doing so, the book offers an introduction to dynamical systems, a framework that has been studied extensively in the last decades to model speech production and perception. The reported acoustic and articulatory data presented in this book show that categorical and continuous modulations used to enhance prosodic prominence are deeply intertwined and even exhibit a kind of symbiosis. A

multi dimensional dynamical model of prosodic prominence is sketched based on the empirical data combining tonal and articulatory aspects of prosodic focus marking The model demonstrates how categorical and continuous aspects can be integrated in a joint theoretical treatment that overcomes a strict separation of phonetics and phonology

Microbiomes of the Built Environment National Academies of Sciences, Engineering, and Medicine, National Academy of Engineering, Division on Engineering and Physical Sciences, Health and Medicine Division, Division on Earth and Life Studies, Board on Infrastructure and the Constructed Environment, Board on Environmental Studies and Toxicology, Board on Life Sciences, Committee on Microbiomes of the Built Environment: From Research to Application, 2017-11-06 People's desire to understand the environments in which they live is a natural one People spend most of their time in spaces and structures designed built and managed by humans and it is estimated that people in developed countries now spend 90 percent of their lives indoors As people move from homes to workplaces traveling in cars and on transit systems microorganisms are continually with and around them The human associated microbes that are shed along with the human behaviors that affect their transport and removal make significant contributions to the diversity of the indoor microbiome The characteristics of healthy indoor environments cannot yet be defined nor do microbial clinical and building researchers yet understand how to modify features of indoor environments such as building ventilation systems and the chemistry of building materials in ways that would have predictable impacts on microbial communities to promote health and prevent disease The factors that affect the environments within buildings the ways in which building characteristics influence the composition and function of indoor microbial communities and the ways in which these microbial communities relate to human health and well being are extraordinarily complex and can be explored only as a dynamic interconnected ecosystem by engaging the fields of microbial biology and ecology chemistry building science and human physiology This report reviews what is known about the intersection of these disciplines and how new tools may facilitate advances in understanding the ecosystem of built environments indoor microbiomes and effects on human health and well being It offers a research agenda to generate the information needed so that stakeholders with an interest in understanding the impacts of built environments will be able to make more informed decisions
