Transforming Politics with Merleau-Ponty Jérôme Melançon, 2021-05-25 The contributors to this book offer productive new readings of Merleau Ponty's political philosophy and of other facets of his thought They each deploy his theories to adopt a critical stance on urgent political issues and contemporary situations within society Each essay focuses on a different aspect of political transformation be it at the personal social national or international level The book as a whole maps out possibilities for thinking phenomenologically about politics without a sole focus on the state turning instead toward contemporary human experience and existence

Merleau-Ponty and the Face of the World Glen A.

Mazis, 2016-09-21 Before his death in 1961 Merleau Ponty worried about what he saw as humanity's increasingly self enclosed and manipulative way of experiencing self others and the world the consequences of which remain apparent in our destructive inability to connect with others within and across cultures In *Merleau Ponty and the Face of the World* Glen A Mazis provides an overall consideration of Merleau Ponty's philosophy that brings out what he sees as a corrective prescription for ethical reorientation that is fundamental to Merleau Ponty's thought Mazis begins by analyzing the key role that silence plays for Merleau Ponty as a positive powerful presence rather than a lack or emptiness and then builds on this to explore the ethical significance of the face to face encounter in his thought as one of solidarity rather than obligation In the last part of the book Mazis traces the development of what he calls physiognomic imagination in Merleau Ponty's work This understanding of imagination is not fancy or make believe but rather brings out the depths of perceptual meaning and leads to an appreciation of poetic language as the key to revitalizing both ethics and ontology Drawing on Merleau Ponty's published works lecture notes unpublished writings and the work of many phenomenologists and Merleau Ponty scholars Mazis also offers incisive readings of Merleau Ponty's work as it relates to that of Antoine de Saint Exupéry Gaston Bachelard and Emmanuel Levinas

The Dissimilarity Representation for Pattern Recognition

Recognition Elżbieta Pękalska, Robert P. W. Duin, 2005 This book provides a fundamentally new approach to pattern recognition in which objects are characterized by relations to other objects instead of by using features or models This dissimilarity representation bridges the gap between the traditionally opposing approaches of statistical and structural pattern recognition Physical phenomena objects and events in the world are related in various and often complex ways Such relations are usually modeled in the form of graphs or diagrams While this is useful for communication between experts such representation is difficult to combine and integrate by machine learning procedures However if the relations are captured by sets of dissimilarities general data analysis procedures may be applied for analysis With their detailed description of an unprecedented approach absent from traditional textbooks the authors have crafted an essential book for every researcher and systems designer studying or developing pattern recognition systems
