Natural Resources: Material Use

Silicon
Silicon is a brittle crystalline solid that is the second most abundant element in the Earth's crust. It is rarely found alone, or in pure form, so it is usually bonded with other substances.
For example, quartz, has silicon in it and is the most abundant when you are walking on the beach, you are walking on or use the silicon in sand or even soil by turning it through in your hands.
 
Quartz Sand
What do we use silicon for that makes our lives more convenient? Well, the device you are using right now needs silicon. Silicon is used to make computer chips. Silicon conducts electricity and helps to better where it keeps up, unlike some other elements.

Geothermal, Hydroelectric and Tidal Energy

Geothermal is a way of producing energy using the heat below the surface of the Earth. To produce large amounts of energy using this process, areas in large amounts need to be drilled and drilled. In this process, the heat that is underneath is used to create electrical energy, which in turn can be used to heat our homes. This process does not produce greenhouse gases, but it is expensive to get started.

Hydroelectric energy is the process of using the kinetic energy of water into electrical energy. In order to produce energy from water, a dam and reservoir have to be built so that the flow of water running across the turbines can be controlled. When the water is released from the dam, it is controlled so that it can flow over water turbines to produce electricity. We have found with most of these renewable energy sources, while they don't produce greenhouse gases, they can impact the environment. When humans build large dams it changes the movement of water, affecting many of the living organisms in the area.

Tidal energy is the process of using the low and high tides of the ocean to produce electrical energy. Tidal energy is produced by using turbines in the turbines. However, along with the benefits of not producing greenhouse gases, it can impact the environment. When humans build large dams it changes the movement of water, affecting many of the living organisms in the area.
