Pragmatics for Latin A. M. Devine, Laurence D. Stephens, 2019-01-30 Latin is often described as a free word order language but in general each word order encodes a particular information structure in that sense each word order has a different meaning Pragmatics for Latin provides a descriptive analysis of Latin information structure based on detailed philological evidence and elaborates a syntax pragmatics interface that formalizes the informational content of the various different word orders Using a slightly adjusted version of the structured meanings theory the book shows how the pragmatic meanings matching the different word orders arise naturally and spontaneously out of the compositional process as an integral part of a single semantic derivation covering denotational and informational meaning at one and the same time

The Violence Against Women Act of 1994 VAWA is the most expansive federal legislation addressing intimate violence in the United States to date Meyer Emerick uses three theories to examine the legislation Foucault s theories on how people develop their ideas about their sexuality Habermas s theories on the legitimacy of the state and MacKinnon s theories of a gender hierarchy preserved through sexual violence Through consideration of interviews with policymakers professionals and focus groups with citizens her analysis suggests that state intervention is limited Additional avenues for combating violence against women is therefore necessary These theories were also used to develop questions that were asked of policymakers and local professionals in interviews and with focus groups of survivors perpetrators and citizens The interviews revealed perceptual differences between the thinking of the policymakers and the local professionals These dissimilarities highlight the practitioners lack of knowledge about the intent of VAWA which may impede service delivery to clients The focus group responses indicated that not only do women have a higher distrust than men but that survivors and perpetrators have opinions that diverge from both local citizens and other participants This demonstrates a need for change in the system that is supposed to be protecting women from violence Meyer Emerick concludes with recommendations for further interventions Policymakers and local providers of social services will find the work of particular value as will scholars and researchers dealing with domestic violence
