Foreign Language Learning With Digital Technology:

Brave New Digital Classroom Robert J. Blake, Gabriel Guillén, 2020-02-20 Robert Blake now with Gabriel Guillén updates his successful book 1st ed 2008 2nd ed 2013 on how to teach foreign languages using technology *Brave New Digital Classroom* touches on all of the key concepts and challenges of teaching with technology focusing on issues specific to FLL or L2 learning and CALL Originally referred to as computer assisted language learning CALL has come to encompass any kind of learning that uses digital tools for language learning This edition reframes the conversation to account for how technology has been integrated into our lives Blake and Guillén address the ways technology can help with L2 how to choose the right digital tools how to use those tools effectively and how technology can impact literacy and identity The book is primed for use in graduate courses terminology is in bold and a comprehensive glossary is included each chapter finishes with a short list of references for further reading on the topic and discussion questions The authors provide short interview videos free via GUP website to enhance discussions on each chapter's topic

Foreign Language Learning with Digital Technology Michael Evans, 2009-04-07 Provides a sustained and in depth qualitative analysis of the use of digital technology within the field of foreign language learning drawing on empirical evidence

Foreign Language Learning with Digital Technology Michael Evans, 2009-02-07 While digital technology is endlessly innovating and improving itself as a tool to support teaching and learning the cognitive process of language learning itself remains perennially the same However digital technology has created new learning opportunities and introduces new elements into the cognitive process of foreign language learning The contributors of this well edited collection examine foreign language learning primarily from a user perspective and explore these underlying questions How does digital technology support existing foreign language learning needs and processes What new learning experiences does it entail for the learner The book situates new insights into the value of digital technology for foreign language learning within the context of evidence from prior research and of educational policy making and examines key pedagogical uses of digital technology in relation to effective foreign language learning by pupils It provides an in depth description of the use of a range of digital media and combines practical ideas for teaching and learning with critical analysis of evidence drawing on an analysis of technology focused language learning across different sectors and in different anglophone contexts

Brave New Digital Classroom Robert J. Blake, 2008 *Brave New Digital Classroom* deftly interweaves results of pedagogical research and descriptions of the most successful computer assisted language learning CALL projects to explore how technology can best be employed in the foreign language curriculum to assist the second language acquisition process Directed to all language teachers whether at the school or the postsecondary level with or without prior experience this book focuses on how to use new technologies effectively Blake urges teachers to move beyond a simple functional competence of knowing how to use the tools toward first a critical competence realizing what the various tools are good for and ultimately a rhetorical competence of knowing how the tools will help transform the learning

environment This book examines the effective use of a range of technologies from Internet sites through computer mediated communication such as synchronous chatting and blogs to distance learning At the end of each chapter questions and activities demonstrate the interactionist learner centered pedagogy Blake espouses An invaluable reference for experienced researchers and CALL developers as well as those of limited experience *Brave New Digital Classroom* is also ideal for graduate level courses on second language pedagogy It will also be of interest to department chairs and administrators seeking to develop and evaluate their own CALL programs *English Learning in the Digital Age* Shuang Zeng, 2018-11-23

Moving beyond the Web 2.0 and digital native rhetoric this book addresses the complex experiences of learners of English as a foreign language EFL in a world embedded with interactive and participatory technologies Adopting a sociocultural perspective it investigates EFL learners behaviours concerning digital technology and guides exploration into their contextually mediated choices and learning practices in the 2.0 era The argument is developed on the basis of the findings of a mixed sequential study that focused on 1485 Chinese undergraduates use and non use of online tools and applications outside the English classroom Particular attention is paid to the role of context and agency when understanding their learning choices and behaviours in the context of digital technology In particular the book acknowledges the explanatory power of agency in the minority instances of good practices among these EFL learners At the same time it demonstrates that for most learners use of the current web is limited and mostly non interactive The barriers to 2.0 transfer are largely contextual and the so called communicative opportunities and participatory culture in particular did not fit into the learners sociocultural context of language learning Overall the compelling argument proposes that the technology facilitated changes in EFL practices are a bottom up process that is taking place in day to day situations and constrained by the learning context within which the learner is situated Based on these arguments the book provides a framework that challenges the existing beliefs about language learning with online technology and that contributes to our understanding of how context mediates EFL learners behaviours surrounding digital technologies It is a valuable resource for teachers researchers and policy makers providing them with insights into using digital technology to stimulate good learning practices outside the classroom

Brave New Digital Classroom Blake, Claire Kramersch, 2013-12-15 *Brave New Digital Classroom* examines the most effective ways to utilize technology in language learning The author deftly interweaves the latest results of pedagogical research with descriptions of the most successful computer assisted language learning CALL projects to show how to implement technology in the foreign language curriculum to assist the second language acquisition process Directed at elementary to postsecondary language teachers the book is ideal for graduate level courses on pedagogy and an invaluable reference for experienced researchers CALL developers and administrators This new enhanced ebook edition features the full text plus eight videos including three talks by the author an interview with Claire Kramersch on using the internet to teach culture Phil Hubbard on criteria for evaluating CALL software Rick Kern discussing telecollaboration and CMC exchanges

with two students Gabriel Guill n on tandem learning and social networks and Paul Rama on games and gaming
