

Chapter 1

Introduction

FORENSIC SCIENCE & ITS ROLE IN THE JUSTICE SYSTEM

- Forensic science is science in service of the law
- Forensic= "having to do with the law"
- Forensics= "debating" (not the same as forensic science)
- Before the last 30 year it has served to confirm identifications and the nature of well-defined evidence items.
- Computerized databases are the largest factor that has changed the need for forensic science.
 - Began with the development of automated identification systems.
- Fingerprint identification systems were initially private but became a gov't sponsored activity.
 - Systems can make use of 10-print fingerprint cards and latent fingerprints
- All states have access to fingerprint database and are interconnected through the federal system.
- Databases have expanded and now collect DNA through the CODIS database.
 - CODIS= Combined DNA Indexing System
- Forensic-based databases are expanding in areas such as firearms-related and trace evidence-based databases.
- Forensic science labs work on criminal and civil cases.
 - Civil ex. Product failure liability, paternity resolutions
- Most public forensic science labs are supported by municipalities, counties, states gov'ts or the federal gov't
- Broad term for different scientific and technological specialty areas

CONTRIBUTIONS PROVIDED BY FORENSIC LABS

- Aid in investigation of incidents of possible legal interest
 - Work submitted to and done in forensic labs is *post facto* (after crime committed and suspect is arrested)
- Help establish basic legal elements of a crime
 - *Corpus delicti*= body or "element" of crime
 - Elements are things that prosecutor is obligated to prove beyond reasonable doubt to gain conviction
 - Must prove all required elements of crime
- Support or disprove statements by witnesses, victims or suspects
 - If physical evidence and analysis shows something that contradicts a statement by someone in a case, the statement is incorrect
- Identify substances or materials
 - Examination of physical evidence provides identification of a substance or material.
 - Ex. Controlled substance possession or counterfeiting case
- Identify persons
 - Automated Fingerprint Identification System (AFIS) contains known fingerprints and evidentiary fingerprints not yet identified
 - National Integrated Ballistic Identification Network (NIBIN) contains image data from bullets and cartridge cases from known weapons seized in case and from evidence collected in unsolved

Forensics Chapter 1 Test:

The Official CHFI Study Guide (Exam 312-49) Dave Kleiman, 2011-08-31 This is the official CHFI Computer Hacking Forensics Investigator study guide for professionals studying for the forensics exams and for professionals needing the skills to identify an intruder's footprints and properly gather the necessary evidence to prosecute. The EC Council offers certification for ethical hacking and computer forensics. Their ethical hacker exam has become very popular as an industry gauge and we expect the forensics exam to follow suit. Material is presented in a logical learning sequence: a section builds upon previous sections and a chapter on previous chapters. All concepts, simple and complex, are defined and explained when they appear for the first time. This book includes Exam objectives covered in a chapter, clearly explained in the beginning of the chapter. Notes and Alerts highlight crucial points. Exam's Eye View emphasizes the important points from the exam's perspective. Key Terms present definitions of key terms used in the chapter. Review Questions contains the questions modeled after real exam questions based on the material covered in the chapter. Answers to the questions are presented with explanations. Also included is a full practice exam modeled after the real exam. The only study guide for CHFI provides 100% coverage of all exam objectives. CHFI Training runs hundreds of dollars for self tests to thousands of dollars for classroom training.
