The Economics of Defense Industry Thomas-Durell Young,2023-10-17 This book on the economics of defence industry assesses a series of historical and contemporary case studies that consistently demonstrate the need for governments to recognise and thereafter factor the financial needs of a narrow industrial sector that is capital intensive technologically advanced and that requires a highly skilled labour force Since the end of the cold war Western governments have systematically reduced financial support to their domestic defence industry and have seemingly ignored planning and funding industrial mobilisation In all cases government policy has been to encourage industries to consolidate capacity to become financially viable in a sector that has seen diminished demand The 2022 Russian invasion of Ukraine has caused Western governments to reassess their previous assumptions Efforts to

increase industrial capacity have been met with the iron laws of economics whereby businesses need to show return on investments. The chapters in this volume posit that efforts to rationalise industrial capacity and innovation to meet short term financial efficiencies inevitably results in limited expensive and long delays in increased production in times of international crisis. This book serves as an essential guide for academics researchers and students interested in defence economics industrial economics international relations and industrial policy. The chapters in this book were originally published in various issues of Defense Security Analysis.

General Jan Smuts And his First World War in Africa (1914-19-17) David Brock Katz, 2022-08-24. An engaging well written and meticulously researched military biography. Tim Stapleton, Professor Department of History University of Calgary. Jan Smuts grabbed the opportunity to realise his ambition of a Greater South Africa when the First World War ushered in a final scramble for Africa. He set his sights firmly northward upon the German colonies of South West Africa and East Africa. Smuts's abilities as a general have been much denigrated by his contemporaries and later historians but he was no armchair soldier. He first learned his soldier's craft under General Koos de la Rey and General Louis Botha during the South African War 1899-1902. He emerged from that conflict immersed in Boer manoeuvre doctrine. After forming the Union Defence Force in 1912, Smuts played an integral part in the German South West African campaign in 1915. Placed in command of the Allied forces in East Africa in 1916, he led a mixed bag of South Africans and imperial troops against the legendary Paul von Lettow Vorbeck and his Schutztruppen. His penchant for manoeuvre warfare and mounted infantry freed most of the vast German territory from Lettow Vorbeck's grip. General Jan Smuts and his First World War in Africa provides a long overdue reassessment of Smuts's generalship and his role in furthering the strategic aims of South Africa and the British Empire during this era.
