Guoqing Zhou,2020-12-22 With urbanization as a global phenomenon there is a need for data and information about these terrains Urban remote sensing techniques provide critical physical input and intelligence for preparing base maps formulating planning proposals and monitoring implementations Likewise these methodologies help with understanding the biophysical properties patterns and process of urban landscapes as well as mapping and monitoring urban land cover and spatial extent Advanced sensor technologies and image processing methodologies such as deep learning data mining etc

facilitate the wide applications of remote sensing technology in urban areas This book presents advanced image processing methods and algorithms focused on three very important roots of urban remote sensing 3D urban modelling using different remotely sensed data urban orthophotomap generation and urban feature extraction which are also today's real challenges in high resolution remote sensing Data generated by remote sensing with its repetitive and synoptic viewing and multispectral capabilities constitutes a powerful tool for mapping and monitoring emerging changes in the city's urban core as well as in peripheral areas Features Provides advances in emerging methods and algorithms in image processing and technology Uses algorithms and methodologies for handling high resolution imagery from a ground sampling distance GSD less than 10 meter Focuses on 3D urban modelling orthorectification methodologies and urban feature extraction algorithms from high resolution remotely sensed imagery Demonstrates how to apply up to date techniques to the problems identified and how to analyze research results Presents methods and algorithms for monitoring analyzing and modeling urban growth urban planning and socio economic developments In this book readers are provided with valuable research studies and applications oriented chapters in areas such as urban trees soil moisture mapping city transportation urban remote sensing big data etc

**BBC Wildlife**, 2008      **The Chimpanzees of Rubondo Island** Josephine Nadezda Msindai, Volker Sommer, 2022-10-05

How did a random batch of chimpanzees come to populate a small island in Tanzania where apes had never lived before Combining information gathered from fieldwork laboratory and archival research this book tells the unique story of chimpanzee babies taken from their forest homes in West Central Africa and sold to European zoos and circuses to then be shipped to Lake Victoria and set free on Rubondo Island These founder animals learnt what to eat how to build nests to breed and raise young ultimately forming a chimpanzee typical fission fusion society that today is thriving The authors compare the ecology behaviour and genetics of the Rubondo population with communities of wild chimpanzees providing exciting insights into how our closest relatives adjust to changing environments At the same time a reconstruction of the historical context of the Rubondo experiment reflects on its chequered colonial heritage and the introduction is viewed against current threats to the survival of apes in their natural habitats The book will be of interest to scholars and professionals working in primatology animal behaviour conservation biology and postcolonial studies      Altered Ecologies Simon Haberle, Janelle
