

RECOMMENDED GROUNDING METHOD

This dehumidifier must be grounded. This dehumidifier is equipped with a power supply cord with a three-prong grounding plug. The cord must be plugged into a mating, grounded three-prong outlet, grounded in accordance with all local codes and ordinances. If a mating outlet is not available, it is the customer's responsibility to have a properly-grounded three-prong outlet installed by a qualified electrical installer.

It is the customer's responsibility:

- To contact a qualified electrical installer.
- To assure that the electrical installation is adequate and conforms to the National Electrical Code, ANSI/NFPA 70-last edition, and all local codes and ordinances.

LOCATION REQUIREMENTS

NOTE: Your model may differ from the one shown.

- Allow at least 12 to 18" (30.5 to 45.7 cm) of space on the side of the dehumidifier for models with side louvres, and above the dehumidifier for models with top louvres.
- You will need a surface strong enough to support the dehumidifier when its bucket is full of water.
- You will need a surface level enough to keep the water from spilling when the bucket is full of water.
- Keep all outside doors, windows and other openings closed when you are operating the dehumidifier. Humid outdoor air will increase the dehumidifier's workload.
- Install the dehumidifier in an area where the temperature will not fall below 38 °F (3°C). Lower temperatures will cause performance to drop.
- Do not block the louvres on the front panel and/or the side panel.

A. 12 to 18" (30.5 to 45.7 cm)
