

Part II: Kinetic Energy and Speed

Sketch and compare the distributions for kinetic energy and speed at two different temperatures in the table below. Record your temperatures (T_1 and T_2), set Volume as a Constant Parameter, and use roughly the same number of particles for each experiment (aim for ~100-200). Use the T_2 temperature to examine a mixture of particles.

Tips:

$T_1 = \underline{\hspace{2cm}}$ K

$T_2 = \underline{\hspace{2cm}}$ K

The Species Information and Energy Histograms tools will help.

The system is dynamic so the distributions will fluctuate.

Sketch the average or most common distribution that you see.
