International Handbook On Business Process Management:

Handbook on Business Process Management 1 Jan vom Brocke, Michael Rosemann, 2010-09-21 Business Process Management BPM has become one of the most widely used approaches for the design of modern organizational and information systems. The conscious treatment of business processes as significant corporate assets has facilitated substantial improvements in organizational performance but is also used to ensure the conformance of corporate activities. This Handbook presents in two volumes the contemporary body of knowledge as articulated by the world's leading BPM thought leaders. This first volume focuses on arriving at a sound definition of Business Process Management approaches and examines BPM methods and process-aware information systems. As such, it provides guidance for the integration of BPM into corporate methodologies and information systems. Each chapter has been contributed by leading international experts. Selected case studies complement these views and lead to a summary of BPM expertise that is unique in its coverage of the most critical success factors of BPM.

Business Process Management Workshops Stefanie Rinderle-Ma, Shazia Sadiq, Frank Leymann, 2010-04-01 Business process management BPM constitutes one of the most exciting search areas in computer science and the BPM Conference together with its workshops provides a distinct platform for presenting the latest research and showing future directions in this area. These proceedings contain the national versions of papers accepted for the workshops held in conjunction with the 7th International Conference on Business Process Management BPM 2009. The BPM 2009 conference and workshops took place in Ulm, Germany. We received many interesting workshop proposals, eight of which were selected. Ultimately, the workshops ran on September 7, 2009, featuring highly interesting keynotes, inspiring scientific presentations, and fruitful discussions. The history of five years of BPM workshops in a row proves the continued success of the workshop program. The workshop held in 2009 included one new workshop on empirical research in business process management and seven well-established workshops. First International Workshop on Empirical Research in Business Process Management ER BPM 2009. The ER BPM 2009 workshop addressed the demand for empirical research methods such as experimental or case studies to BPM and invited fellow colleagues to investigate both the potential and the limitations of BPM methods and technologies in practice. The ER BPM workshop aimed at closing the gap in knowledge on process management and at discussing empirical research in the space of BPM and associated phenomena. 12th International Workshop on Reference Modeling RefMod 2009. Although conceptual models have proven to be a useful means to support information systems engineering in the past few years, creating and especially maintaining conceptual models can be quite challenging and costly.
