### **Introduction**

The presentation focuses on the topic of interpersonal communication. It encompasses the definition, the importance, types, and arms of interpersonal communication. Additionally, it focuses on the Knapp's relationship models, barriers of interpersonal communication, and how to overcome them. Finally, it addresses why I chose to focus on the topic of interpersonal communication.

### **Involvement**

First, interpersonal communication is a type of communication where two or more individuals are involved. It entails gestures, voice, body language facial expressions, among other communication forms. There is numerous importance of interpersonal communication. Through this type of communication, healthcare officers can build trust with the patients; they can solve problems that may arise while performing duties and aligns them to healthcare goals (Jung, 2018). Interpersonal communication is essential when changing healthcare management alongside building healthcare culture. It allows us to develop and strengthen personal relationships between patients and nurses.

The types of interpersonal communication concerned in the presentation are direct, mediated, mass, and transpersonal. In direct interpersonal communication, a person speaks their mind to an active listener, saying what they feel and think. In mediated interpersonal communication, the message is conveyed via a medium. Mass interpersonal communication entails sending a message to several people via mass media such as social media platforms (Eklof & Ahlberg, 2016). Transpersonal interpersonal communication involves interaction between a healthcare officer like a doctor with another person.

### **Arms of Interpersonal Communication**

The arms of interpersonal communication are verbal, non-verbal, written, and visual interpersonal communication. In verbal, information is transferred through sign languages or speaking (Head & Bute, 2018). Nonverbal interpersonal communication employs gestures, body language, and facial expressions to relay information to either a patient or a nurse. Written communication involves printing, typing, or writing symbols or letters to forwarding information (Head & Bute, 2018). Visual interpersonal communication entails sketching, drawing, and photography to convey information (Head & Bute, 2018).

There are two types of relationship models enforced by Knapp. The steps of Knapp's relationship escalation to the model are initiation, experimentation, intensifying, integration, and bonding. The stages of Knapp's relationship termination model are differentiating, circumscribing, stagnating, avoiding, and termination (Eklof & Ahlberg, 2016). The barriers to interpersonal communication occur when individuals succumb to criticism. They also arise when complicated words are used to convey simple information/messages. They happen when parties engage in inactive listening. The barriers lead to undermining mutual respect. They undermine teamwork and compromise
