Introduction of IAS / IFRS by the BMW AG in 2000 Johannes-Cornelius Adari, Henrik Thrane, Pascale Taube, 2004-08-11 Inhaltsangabe Abstract This case study deals with an important financial aspect of multinational companies i.e. their obligation of accounting Until the year 2000 BMW used to prepare its annual external audits under German Commercial Code Standards HGB This tradition ended in 2000 when BMW accounted under International Accounting Standards IAS for the first time 7 years before Mercedes Benz was the first German automotive manufacturer adopting international Standards in 1993 But in Mercedes case US Generally Accepted Accounting Principles US GAAP were chosen because the objective was to become listed at the New York Stock Exchange NYSE At this time US GAAP were not accepted outside the North American Free Trade Association NAFTA esp not by the EU Commission but the US Principles were applied in the largest and most important stock market worldwide On the other hand US organizations like the Securities and Exchange Commission SEC did not accept any other accounting standards in these days Accordingly Mercedes Benz had to prepare two annual audits one under US GAAP and the other under HGB This treatment obviously was highly inefficient providing lots of encumbrances to US capital seeking European companies accounting and auditing took too much time personnel resources and money Another negative effect was that many US companies hesitated with urgently required investments in Europe But nevertheless multinational groups seemed to have several advantages by using international accounting standards even if they had to prepare more than one audit annually Within the 1st part this case study provides basic information dealing with accounting standards in particular reasons and objectives organizational patterns and the process of IAS becoming internationally accepted by pointing out their most important differences compared to US GAAP and German HGB Standards The 2nd part deals with the reasons of changing BMW's accounting standards by looking at the Group's key markets and the impact of IAS adoption by examining their figures of non-current assets inventories other current assets liabilities deferred incomes provisions equity as well as research development within a four

years comparison At last the 3rd part gives an examination and summary of the results of IAS reception for BMW the effects on the stock market changes of rating on the global market and gives hints to future An Introduction to High-Frequency Finance Ramazan Gençay, Michel Dacorogna, Ulrich A. Muller, Olivier Pictet, Richard Olsen, 2001-05-29 Liquid markets generate hundreds or thousands of ticks the minimum change in price a security can have either up or down every business day Data vendors such as Reuters transmit more than 275 000 prices per day for foreign exchange spot rates alone Thus high frequency data can be a fundamental object of study as traders make decisions by observing high frequency or tick by tick data Yet most studies published in financial literature deal with low frequency regularly spaced data For a variety of reasons high frequency data are becoming a way for understanding market microstructure This book discusses the best mathematical models and tools for dealing with such vast amounts of data This book provides a framework for the analysis modeling and inference of high frequency financial time series With particular emphasis on foreign exchange markets as well as currency interest rate and bond futures markets this unified view of high frequency time series methods investigates the price formation process and concludes by reviewing techniques for constructing systematic trading models for financial assets
