Ka Unit Question Of Dhaka University:

Disaster Risk Reduction in Indonesia Douglas Paton, Saut Sagala, 2018 Indonesia's history of disasters and particularly the Indian Ocean Tsunami of 2004 triggered numerous changes not only to Indonesian disaster management and its associated legislative frameworks but also to its community based initiatives. The citizens face many challenges from diverse complex and evolving hazards emanating from geological, terrestrial, hydro-meteorological hazards and climate change. This book discusses several ways in which strategies utilizing environmental, livelihood, social and cultural resources can be used to develop effective disaster risk reduction designed to sustain social, cultural and economic life in Indonesia. A key focus is understanding the capabilities, processes and relationships of everyday life and developing them to ensure that disaster reduction strategies can be incorporated into mainstream community life in urban, rural and island settings. The following topics are featured: disaster reduction and developing an Indonesian perspective; the adaptation by farmers in dealing with climate change; promoting adaptive capacity of coastal communities to climate change; community resilience to the Mount Merapi volcanic disaster; community vulnerability to health and water hazards in Semarang; the mobility and livelihood of small islands; the national climate change perspective; flood management practice; food security; carbon management and climate risk reduction; water management strategy for resilience; cultural heritage to increase community resilience; local wisdom and community resilience; cultural drivers of disaster risk reduction behavior; and the case of Pulau Simeulue rethinking resilience culture and disasters; community disaster recovery after the 2010 Mount Merapi eruption; seizing opportunities for change towards sustainability during disaster recovery; and the case of Aceh, Indonesia and the overall disaster reduction in Indonesia and moving forward. The purpose of this text is to highlight the importance of strategies that encompass the local, regional and national levels of analysis which seeks to ensure all stakeholders play important roles in the development and implementation of disaster risk reduction strategies. This book will serve as an outstanding resource for practitioners and academics to adopt an integrative approach to develop the functional beliefs, knowledge, relationships and actions that Indonesia and its citizens need to thrive and prosper in increasingly hazardous times.

The Transport System and Transport Policy Bert van Wee, Jan Anne Annema, David Banister, 2013 This very interesting book provides an excellent multi-disciplinary introduction into the functioning of transport systems and the interaction with their environments. Erik Verhoef, VU University Amsterdam, The Netherlands. The editors of this important book have clearly identified that few writings on transport treat the transport system as a whole. Implicit in this is a need for a genuinely multidisciplinary approach. An impressive list of contributors ensures that the book draws on the latest research whilst providing new insights into some of the key challenges facing transport students and researchers, transport providers and policy makers. Roger Vickerman, University of Kent, UK. Since ancient times transportation has brought our world together. But the need for connectivity and accessibility in a spatially differentiated world has prompted the emergence of

very complex transportation systems This book offers a fresh and operational contribution to a better understanding of the complexity and manageability of a mobile world by addressing in a balanced way both conceptual and applied or policy aspects of modern transportation systems Peter Nijkamp Free University of Amsterdam The Netherlands Transport impacts on people and businesses in many different ways and presents some of the key problems that decision makers need to address This comprehensive textbook introduces the transport system in a holistic and multidisciplinary way bringing together the myriad components of transport This textbook is written for an international readership of undergraduate and postgraduate students in transport and related subjects as well as for professionals and policy decision makers across both public and private sectors Key features include Discussion of the importance of transport accessibility and the impacts of transport on the environment and safety Policy issues relating to all of the discussed issues and prescribed future options Transport evaluation methods and modelling approaches Examples to highlight the linkages between components of the transport system for example infrastructures land use vehicle technologies and the relevance of these linkages for decision making

Complex Analysis Steven G. Krantz, 2006-11-14 This conference gathered together a small group of people with similar interests in the geometric function theory of several complex variables While the speeches were of a specialized nature the papers in the proceedings are largely of a survey and speculative nature The volume is intended to serve both students and researchers as an invitation to active new areas of research The level of the writing has been intentionally set in such a way that the papers will be accessible to a broad audience

Mental Disorder and Criminal Law Robert Schopp, Richard L. Wiener, Brian H. Bornstein, Steven L. Willborn, 2008-10-09 Robert F Schopp Recent Supreme Court decisions categorically preclude the application of capital punishment to convicted offenders who were below the age of eighteen or mentally 1 retarded at the time they committed the crimes for which they were sentenced Neither opinion suggests that offenders in these categories cannot be criminally responsible for their offenses and the Atkins opinion explicitly recognizes that some mentally 2 retarded offenders can qualify as criminally responsible for their offenses In each case part of the reasoning in support of the exemption from capital sentences purports to show that capital punishment of these offenders would serve neither the retributive 3 nor the deterrent functions of criminal punishment Both opinions focus substantial attention on the retributive rationale contending that these offenders lack sufficient 4 culpability blameworthiness or depravity to merit capital punishment The opinions recognize that a categorical bar for all offenders below a specified age or level of intelligence might exempt some individuals who do not lack culpability sufficient to justify capital sentences The opinions draw categorical rules however to avoid the risk that some individuals who lack sufficient culpability to deserve capital punish 5 ment will be misidentified as sufficiently culpable to merit capital sentences The dissenting opinions in each case recognize that offenders in these categories have limitations that render them less culpable on average than unimpaired offenders who commit similar crimes

The Cognitive Autopsy Pat Croskerry, 2020-05-22 Behind heart disease and cancer medical error is now listed as one of the leading causes of death Of the many medical errors that may lead to injury and death diagnostic failure is regarded as the most significant Generally the majority of diagnostic failures are attributed to the clinicians directly involved with the patient and to a lesser extent the system in which they work In turn the majority of errors made by clinicians are due to decision making failures manifested by various departures from rationality Of all the medical environments in which patients are seen and diagnosed the emergency department is the most challenging It has been described as a wicked environment where illness and disease may range from minor ailments and complaints to severe life threatening disorders The Cognitive Autopsy is a novel strategy towards understanding medical error and diagnostic failure in 42 clinical cases with which the author was directly involved or became aware of at the time Essentially it describes a cognitive approach towards root cause analysis of medical adverse events or near misses Whereas root cause analysis typically focuses on the observable and measurable aspects of adverse events the cognitive autopsy attempts to identify covert cognitive processes that may have contributed to outcomes In this clinical setting no cognitive process is directly observable but must be inferred from the behavior of the individual clinician The book illustrates unequivocally that chief among these cognitive processes are cognitive biases and other flaws in decision making rather than knowledge deficits
