Organización, gestión y ejecución de proyectos industriales Storch de Gracia, José María, Herrero Sánchez, Borja, 2018-09-01 El lector tiene en sus manos un libro circunscrito a la organización y gestión de proyectos industriales El texto se enfoca a la industria Química pero la forma en que los autores exponen analizan y desarrollan los

conceptos de la gestión de proyectos lo hace también válido para otros tipos de industria como la energética. Los objetivos de los proyectos son evaluar, proponer, contratar, diseñar, construir y arrancar una o varias plantas industriales capaces de transformar unos bienes y servicios en otros de valor mayor. Ello no de cualquier manera sino optimizando a lo largo de la ejecución la tensión entre precio, plazo y calidad. La obra se divide en dos partes. La primera aborda conceptos generales de la gestión de proyectos industriales como son, por ejemplo, las estimaciones económicas, la planificación, el control de actividades, etc. La segunda parte desarrolla la secuencia normal en la ejecución de los proyectos partiendo de la propuesta técnica y económica pasando por el diseño y la gestión de acopios hasta llegar a la construcción y la puesta en marcha de una planta industrial.

Field Sampling Methods for Remedial Investigations Mark Edward Byrnes, 2022-09-28. Originally published in 1994, the first edition of *Field Sampling Methods for Remedial Investigations* soon became a premier resource in this field. The Princeton Groundwater course designated it as one of the top books on the market that addresses strategies for groundwater characterization, groundwater well installation, well completion, and groundwater sampling. This long-awaited third edition provides the most current and most cost-effective environmental media characterization methods and approaches supporting all aspects of remediation activities. This book integrates recommendations from over one hundred of the most current US EPA, State EPA, US Geological Survey, US Army Corps of Engineers, and National Laboratory environmental guidance and/or technical documents. This book provides guidance, examples, and/or case studies for the following subjects: Implementing the EPA's latest Data Quality Objectives process; Developing cost-effective statistical/non-statistical sampling designs supporting all aspects of environmental remediation activities; and available statistical sample design software. Aerial photography, surface geophysics, airborne surface downhole building radiological surveys, soil gas surveying, environmental media sampling, DNAPL screening, portable X-ray fluorescence measurements, Direct push groundwater sampling, well installation, well development, well purging, no-purge low-flow standard groundwater sampling, depth discrete ground sampling, groundwater modeling, Tracer testing, slug testing, waste container and building material sampling, pipe surveying, defining background conditions, Documentation, quality control, sampling data verification, validation, data quality assessment, decontamination, health/safety management of investigation waste. A recognized expert on this subject, author Mark Byrnes provides standard operating procedures and guidance on the proper implementation of these methods, focusing on proven technologies that are acknowledged by EPA and State regulatory agencies as reputable techniques.
