S INDEX G N RAL ADDENDA TABLE DES PLANCHES , *Trois théories antiques de la divination: Plutarque, Jamblique, Augustin* Andrei Timotin, 2022-03-07 This book examines three authors Plutarch Iamblichus and Augustine who deeply impacted the ancient philosophical debates about divination The author highlights the coherence of ancient theories about divination the importance of the Platonic heritage in this intellectual history its dialogue with other philosophical schools e g the Peripatetics and Stoa and its echoes in Patristic thought This book thus sheds light on an essential but relatively neglected aspect of the relationship between philosophy and religion in Antiquity Ce livre examine trois auteurs Plutarque Jamblique et Augustin qui ont marqué les débats philosophiques sur la divination dans l'Antiquité L'auteur met en évidence la cohérence de la pensée antique relative à la divination l'importance de l'héritage platonicien dans cette histoire intellectuelle son dialogue avec d'autres courants philosophiques e g l'aristotélisme et le stoïcisme et sa postérité dans la pensée patristique Ce livre contribue ainsi à clarifier un aspect essentiel mais relativement négligé des rapports entre philosophie et religion dans l'Antiquité **A Moment's Ornament** Corinne Ondine Pache, 2011-01-10 From Hesiod's first person account of his encounters with the Muses on Mount Helikon to Theokritos nymphs love between goddesses and mortal men provides the ancient Greeks with a way of articulating both the genealogical and cultic connection to their gods and to their past A Moment's Ornament examines the theme of nympholepsy the experience of being seized by a nymph or a goddess in ancient Greek cult and poetry from the Archaic to the Hellenistic period In poetry this topos which is ubiquitous in many of the most well known ancient Greek sources focuses on the figure of the goddess or nymph who falls in love with a mortal man and subsequently bears a mortal child The theme also finds its way in ritual as stories of encounters between divinities and mortal men give rise to sanctuaries centering on nymphs and nympholepts Beyond the individual dimension of the nympholeptic experience these narratives are also integrated within the community through both poetry and shrines Nympholeptic narratives thus articulate key elements of the bond between mortals and immortals and the connection between myth and ritual in ancient Greece Both the cave sanctuaries founded by ancient nympholepts and the poets' narratives of love between goddesses and their mortal lovers function as a moment's ornament by preserving the memory of an encounter with the otherworldly at the intersection between myth and cult **The Invention of the Inspired Text** John C. Poirier, 2021-01-28 John C Poirier examines the theopneustic nature of the Scripture as a response to the view that inspiration lies at the heart of most contemporary Christian theology In contrast to the traditional rendering of the Greek word theopneustos as God inspired in 2 Tim 3 16 Poirier argues that a close look at first and second century uses of

theopneustos reveals that the traditional inspirationist understanding of the term did not arise until the time of Origen in the early third century CE and that in every pre Origen use of theopneustos the word instead means life giving Poirier thus conducts a detailed investigation of theopneustos as it appears in the fifth Sibylline Oracle the Testament of Abraham Vettius Valens Pseudo Plutarch Placita Philosophorum and Pseudo Phocylides all of whom understand the word to mean life giving He also studies the use of the cognate term theopnous in Numenius the Corpus Hermeticum on an inscription at the Great Sphinx of Giza and on an inscription at a nymphaeum at Laodicea on the Lycus Poirier argues that a rendering of life giving also fits better within the context of 2 Tim 3 16 and that this meaning survived late enough to figure in a fifth century work by Nonnus of Panopolis He further traces the pre Origen use of theopneustos among the Church Fathers Poirier concludes by addressing the implication of rethinking the traditional understanding of Scripture stressing that the lack of God inspired scripture ultimately does not affect the truth status of the gospel as preached by the apostles

Federalism in Greek Antiquity Hans Beck, Peter Funke, 2015-11-05 The world of ancient Greece witnessed some of the most sophisticated and varied experiments with federalism in the pre modern era In the volatile interstate environment of Greece federalism was a creative response to the challenge of establishing regional unity while at the same time preserving a degree of local autonomy To reconcile the forces of integration and independence Greek federal states introduced for example the notion of proportional representation the stratification of legal practice and a federal grammar of festivals and cults Federalism in Greek Antiquity provides the first comprehensive reassessment of the topic It comprises detailed contributions on all federal states in Aegean Greece and its periphery With every chapter written by a leading expert in the field the book also incorporates thematic sections that place the topic in a broader historical and social scientific context

Coins, Bodies, Games, and Gold Leslie Kurke, 2021-01-12 The invention of coinage in ancient Greece provided an arena in which rival political groups struggled to imprint their views on the world Here Leslie Kurke analyzes the ideological functions of Greek coinage as one of a number of symbolic practices that arise for the first time in the archaic period By linking the imagery of metals and coinage to stories about oracles prostitutes Eastern tyrants counterfeiting retail trade and games she traces the rising egalitarian ideology of the polis as well as the ongoing resistance of an elitist tradition to that development The argument thus aims to contribute to a Greek history of ideologies to chart the ways ideological contestation works through concrete discourses and practices long before the emergence of explicit political theory To an elitist sensibility the

use of almost pure silver stamped with the state's emblem was a suspicious alternative to the para-political order of gift exchange. It ultimately represented the undesirable encroachment of the public sphere of the egalitarian polis. Kurke re-creates a language of metals by analyzing the stories and practices associated with coinage in texts ranging from Herodotus and archaic poetry to Aristotle and Attic inscriptions. She shows that a wide variety of imagery and terms fall into two opposing symbolic domains: the city representing egalitarian order and the elite symposium, a kind of anti-city. Exploring the tensions between these domains, Kurke excavates a neglected portion of the Greek cultural imaginary in all its specificity and strangeness.

Heroic Offerings Gina Salapata, 2015-02-12 *Heroic Offerings* sheds light on the study of religion in Sparta, one of Greece's most powerful city-states and the long-term rival of Athens. Sparta's history is well known, but its archaeology has been much less satisfactorily explored. Through the comprehensive study of a distinctive class of terracotta votive offerings from a specific sanctuary, Gina Salapata explores both coroplastic art and regional religion. By integrating archaeological, historical, literary, and epigraphic sources, she provides important insights into the heroic cults of Lakonia and contributes to an understanding of the political and social functions of local ritual practice. This volume focuses on a large group of decorated terracotta plaques from the sixth to fourth centuries BCE. These molded plaques were discovered with other offerings in a sanctuary deposit excavated near Sparta more than fifty years ago, but they have remained unpublished until now. They number over 1,500 complete and fragmentary pieces. In technique, style, and iconography, they form a homogeneous group unlike any other from mainland Greece. The large number of plaques and variety of types reveal a stable and vigorous coroplastic tradition in Lakonia during the late Archaic and Classical period. *Heroic Offerings* will be of interest to students and scholars of Greek history, art, and archaeology, to those interested in ancient religious practice in the Mediterranean, and to all inspired by Athens' chief political rival, Sparta. This volume received financial support from the Archaeological Institute of America.

Valuing Landscape in Classical Antiquity, 2016-05-18 Where am I? Our physical orientation in place is one of the defining characteristics of our embodied existence. However, while there is no human life, culture, or action without a specific location functioning as its setting, people go much further than this bare fact in attributing meaning and value to their physical environment. Landscape denotes this symbolic conception and use of terrain. It is a creation of human culture. In *Valuing Landscape*, we explore different ways in which physical environments impacted on the cultural imagination of Greco-Roman Antiquity. In seventeen chapters with different disciplinary perspectives, we demonstrate the values attached to mountains, the underworld, sacred landscapes, and battlefields, and the evaluations of locale connected with migration, exile, and travel.

Funerary Inscriptions in Early Modern Europe, 2025-05-26 This volume brings together studies that consider funerary inscriptions from Early Modern Europe (1400-1800) from various angles: their material dimension, their literary character, the content of what they are stating, their relation to sculpted and other decorations, and the wider context of a

culture of commemoration and remembrance The central question is how were funerary inscriptions used to shape the memory of a deceased person in such a way as to determine how s he would be remembered and what s he would be commemorated for How would this image fit in the contemporary collective culture of remembrance or in narrower spheres as for instance specific religious groups or denominations Contributors are Faith D Acker Kaylee P Alexander Ramona Baltolu Jens Borchert Pickenhan Veronika Brandis Christopher Joby Jan L de Jong Katharina Kagerer Rodney Lokaj Anu M nd Luise Mervin John Nassichuk Stefania Pasti Snezana Rajic Robert Seidel Federica Vermot Arsenii Vetushko Kalevich Maia Wellington Gahtan and Stamatis Zochios

Drawing Lots Irad Malkin, Josine Blok, 2024 This book offers the first comprehensive study of drawing lots as a central ubiquitous institution of ancient Greek society Led by an egalitarian mindset Greeks drew lots as a matter of course to distribute inheritance booty sacrificial meat and lands to mix groups select individuals and set turns Lot oracles were used for divination otherwise the gods guarded the justice of the procedure but rarely determined the outcome When drawing lots was gradually applied to polis governance classical Athens made sortition the basis of the first democracy in human history A Greek innovation drawing lots for governance inspires new democratic politics today
