the Built Environment National Academies of Sciences, Engineering, and Medicine, National Academy of Engineering, Division on Engineering and Physical Sciences, Health and Medicine Division, Division on Earth and Life Studies, Board on Infrastructure and the Constructed Environment, Board on Environmental Studies and Toxicology, Board on Life Sciences, Committee on Microbiomes of the Built Environment: From Research to Application, 2017-11-06 People's desire to understand the environments in which they live is a natural one. People spend most of their time in spaces and structures designed, built, and managed by humans, and it is estimated that people in developed countries now spend 90 percent of their lives indoors. As people move from homes to workplaces, traveling in cars and on transit systems, microorganisms are continually with and around them. The human-associated microbes that are shed along with the human behaviors that affect their transport and removal make significant contributions to the diversity of the indoor microbiome. The characteristics of healthy indoor environments cannot yet be defined, nor do microbial clinical and building researchers yet understand how to modify features of indoor environments such as building ventilation systems and the chemistry of building materials in ways that would have predictable impacts on microbial communities to promote health and prevent disease. The factors that affect the environments within buildings, the ways in which building characteristics influence the composition and function of indoor microbial communities, and the ways in which these microbial communities relate to human health and well-being are extraordinarily complex and can be explored only as a dynamic interconnected ecosystem by engaging the fields of microbial biology and ecology, chemistry, building science, and human physiology. This report reviews what is known about the intersection of these disciplines and how new tools may facilitate advances in understanding the ecosystem of built environments, indoor microbiomes, and effects on human health and well-being. It offers a research agenda to generate the information needed so that stakeholders with an interest in understanding the impacts of built environments will be able to make more informed decisions.

Pantelis Sklias, Nikolaos Apostolopoulos, 2022-09-15 **From Social Harm to Zemiology** Victoria Canning, Steve Tombs, 2021-03-30 This book outlines key developments in understanding social harm by setting out its historical foundations and the discussions which have proliferated since. It examines various attempts to conceptualise social harm and highlights key sites of contestation in its relationship to criminology to argue that these act as the basis for an activist zemiology, one directed towards social change for social justice. The past two decades have seen a proliferation of debate related to social harm in and around criminology. From climate catastrophe and a focus on environmental harms, unprecedented deaths generating focus on border harms, and the coronavirus pandemic revealing the horror of mass and arguably avoidable deaths across the globe, critical studies in social harm appear ever more pressing. Drawing on a range of international case studies of cultural, emotional, physical, and economic harms, *From Social Harm to Zemiology* locates the study of social harm in an accessible fashion. In doing so, it sets out how a zemiological lens can move us beyond many of the problematic legacies of

criminology This book rejects criminologies which have disproportionately served to regulate intersectional groups and which have arguably inflicted as much or more harm by bolstering the very ideologies of control in offering minor reforms that inadvertently expand and strengthen states and corporations It does this by sketching out the contours objects methods and ontologies of a disciplinary framework which rejects commonplace assumptions of value freedom From Social Harm to Zemiology advocates social change in accordance with groups who are most disenfranchised and thus often most socially harmed An accessible and compelling read this book is essential reading for all zemiologists critical criminologists and those engaged with criminological and social theory *The New Age in the Modern West* Nicholas Campion,2015-11-19 New Age culture is generally regarded as a modern manifestation of Western millenarianism a concept built around the expectation of an imminent historical crisis followed by the inauguration of a golden age which occupies a key place in the history of Western ideas The New Age in the Modern West argues that New Age culture is part of a family of ideas including utopianism which construct alternative futures and drive revolutionary change Nicholas Campion traces New Age ideas back to ancient cosmology and questions the concepts of the Enlightenment and the theory of progress He considers the contributions of the key figures of the 18th century the legacy of the astronomer Isaac Newton and the Swedish visionary Emanuel Swedenborg as well as the theosophist H P Blavatsky the psychologist C G Jung and the writer and artist Jose Arguelles He also pays particular attention to the beat writers of the 1950s the counterculture of the 1960s concepts of the Aquarian Age and prophecies of the end of the Maya Calendar in 2012 Lastly he examines neoconservatism as both a reaction against the 1960s and as a utopian phenomenon The New Age in the Modern West is an important book for anyone interested in countercultural and revolutionary ideas in the modern West **Relics** Jamie Grove,Max Grove,Mini Museum,2021-10-26 Four billion years in the palm of your hand Relics A History of the World Told in 133 Objects is the story of our planet as you ve never seen it before The Mini Museum is a collection of treasures gathered from across space and time shared by tens of thousands of people in more than 120 countries Each item in the collection is a story connected to a childhood dream of sharing all the wonders the universe has to offer while bringing all of us closer together In this book the Mini Museum team shares the stories of real objects that have shaped our very existence across billions of years of history Beginning with the birth of our solar system and the very building blocks of life you ll explore our dynamic planet from the constant shifting of continents to dramatic and violent upheavals which have changed the course of all life again and again You ll visit mighty civilizations with cultures spanning millennia as well as modern symbols of creativity and innovation and the march of humanity as we reach toward the stars Every item is photographed and presented in detail There are also wild tales of adventure as the crew travels the world and prepares one of the most complex collections ever assembled The Healing Power of Hip Hop Raphael Travis Jr.,2015-12-14 Using the latest research real world examples and a new theory of healthy development this book explains Hip Hop culture s ongoing role in helping Black youths to live long healthy and

productive lives In *The Healing Power of Hip Hop* Raphael Travis Jr offers a passionate look into existing tensions aligned with Hip Hop and demonstrates the beneficial quality it can have empowering its audience His unique perspective takes Hip Hop out of the negative light and shows readers how Hip Hop has benefited the Black community Organized to first examine the social and historical framing of Hip Hop culture and Black experiences in the United States the remainder of the book is dedicated to elaborating on consistent themes of excellence and well being in Hip Hop and examining evidence of new ambassadors of Hip Hop culture across professional disciplines The author uses research informed language and structures to help the reader fully understand how Hip Hop creates more pathways to health and learning for youth and communities
