scientists announced new experimental findings that would not only threaten the conduct and publication of influenza research but would have significant policy and intelligence implications The findings presented a modified variant of the H5N1 avian influenza virus hereafter referred to as the H5N1 virus that was transmissible via aerosol between ferrets These results suggested a worrisome possibility the existence of a new airborne and highly lethal H5N1 virus that could cause a deadly global pandemic In response a series of international discussions on the nature of dual use life science arose These discussions addressed the complex social technical political security and ethical issues related to dual use research This Research Topic will be devoted to contributions that explore this matrix of issues from a variety of case study and international perspectives *Complex Dynamical Systems in Education* Matthijs Koopmans,Dimitrios

Stamovlasis,2016-02-19 This book capitalizes on the developments in dynamical systems and education by presenting some of the most recent advances in this area in seventeen non overlapping chapters The first half of the book discusses the conceptual framework of complex dynamical systems and its applicability to educational processes The second half presents a set of empirical studies that illustrate the use of various research methodologies to investigate complex dynamical processes in education and help the reader appreciate what we learn about dynamical processes in education from using these approaches

Technology-Enhanced Learning and the Virtual University Michael David Sankey,Henk

Huijser,Rachel Fitzgerald,2023-09-20 Since the first works on Higher Education Administration in the 1970s no comprehensive work in terms of purpose and scope of Higher Education has been published There have been important changes in people s aspirations vis vis higher education globally In parallel the higher education systems worldwide have been undergoing constant transformation in response to these aspirations From governments employers and prospective students and their parents the stakeholders in higher education system are now extremely varied paying close attention to the various aspects of higher education from infrastructure on campus safety and security to administration faculty and curricula The present series attempts to take into account the issues of importance to all the stakeholders Hence the series not only pays attention to the purpose and outcomes of higher education but also the economics surrounding higher education vis a vis marketization The nitty gritty of running and maintaining a university infrastructure impact of globalization and internationalization on delivery and demand of higher education the commoditization of research and changing paradigms of teaching and learning fall within the purview of the series The increasing competition from other entities to provide degrees certificates or other forms of credentials makes it important to have a work that brings all of the elements together to see how they actually interact and inter relate from a systems perspective The present series attempts to comprehensively attend to these issues and provide a complete reference resource to all those involved and interested in setting up of a Higher Education institution and its administration
