Effective Learning in the Life Sciences David J. Adams, 2011-10-17 Effective Learning in the Life Sciences is intended to help ensure that each student achieves his or her true potential by learning how to solve problems creatively in laboratory field or other workplace setting. Each chapter describes state of the art approaches to learning and teaching and will include case studies worked examples and a section that lists additional online and other resources. All of the chapters are written from the perspective both of students and academics and emphasize and embrace effective scientific method throughout. Essays on Life Sciences, with Related Science Fiction Stories Pier Luigi Luisi, 2020-01-02 This collection of essays highlights in a new critical fashion some of the classic questions in life science. These include what is life what is death what is consciousness why is life cellular and why are enzymes macromolecules. It also explores whether evolution is pre-determined whether science and spirituality can harmonize with each other whether artificial intelligence is at odds with the human spirit and whether and to what extent we are genetically determined. In this text some of the main conceptual tools used to tackle life's many aspects are necessarily reviewed such as the systems view of life the notion of contingency and the concept of autopoiesis. Each of the three chapters of the book contains a number of short science fiction stories which discuss aspects of the present day development of artificial intelligence.

Twenty-six Additional Scientific Papers and Philosophical Essays That Will Eventually Compel Scholars to Rethink the World Daniel Zanou, 2024-01-08 This compilation of twenty six scientific papers and philosophical essays expands the mind/body problem of the French philosopher and mathematician Ren Descartes. We expose the nature of consciousness we discuss its origin and manifestations in living organisms. We distinguish it from life and elaborate on human existence on Earth. From there we solve the ancient enigma posited by Epicurus the

Greek philosopher In science we take over Schrodinger s works on the body s entropy and use the research of the Japanese Nobel laureate Yoshinori Ohsumi to explain how non living atoms transition to living molecules Francis Crick s faded dream that becomes reality We delve into the living organisms to explain various losses of consciousness and awareness including sleep syncope and death We mainly focus on sleep to elucidate this mystery that no living organisms escape *Mick-Rick Essays on the Sacred and Profane* Michael Maasdorp, Richard Arthur DeRemee, 2007-11-19 This second Mick Rick book begins by posing ten questions to which the authors independently respond with short essays This format contrasts with the debates of book one The Mick Rick Debates Controversies in Contemporary Christianity The ten Questions touch on fundamental issues facing today's Christians such as suffering life after death religious cosmology moral principles and others The intention of the questions is not to provide pat answers but rather to stimulate reflection on the nature and content of Christian Faith in the context of the modern world The second part of the book consists of two essays In Before and After the Big Bang Rick argues it is possible to live in both the worlds of materialism as represented by science and the immaterial world of religion Religion or the sacred provides meaning for life science or the profane provides for our material needs Mick holds the idea of traffic between the natural and supernatural destroys the foundations of modern knowledge In his essay On Our Own But not Alone he suggests that to attain maturity we must also gain autonomy neither of which survives in a world invaded by the supernatural The book concludes with a debate on the nature of Constructs that are key mental tools used in religious and philosophical discourse Similar to the first book the interlocutors Michael Maasdorp Mick and Richard Arthur DeRemee Rick conducted their conversations over the Internet on the Radical Faith web site http://homepages.which.net/radical_faith/index.htm Pratiyogita Darpan ,2007-02 Pratiyogita Darpan monthly magazine is India s largest read General Knowledge and Current Affairs Magazine Pratiyogita Darpan English monthly magazine is known for quality content on General Knowledge and Current Affairs Topics ranging from national and international news issues personality development interviews of examination toppers articles write up on topics like career economy history public administration geography polity social environment scientific legal etc solved papers of various examinations Essay and debate contest Quiz and knowledge testing features are covered every month in this magazine New Trends in International Librarianship P.
