## Electrical Requirements

If codes permit and a separate ground wire is used, it is recommended that a qualified electrical installer determine that the ground path and wire gauge are in accordance with local codes.

Do not use an extension cord.

Be sure that the electrical connection and wire size are adequate and in conformance with the National Electrical Code, ANSI/NFPA 70-latest edition and all local codes and ordinances.

A copy of the above code standards can be obtained from:  
National Fire Protection Association  
1 Batterymarch Park  
Quincy, MA 02169-7471

**WARNING:** Improper connection of the equipment-grounding conductor can result in a risk of electric shock. Check with a qualified electrician or service technician if you are in doubt as to whether the appliance is properly grounded. Do not modify the power supply cord plug. If it will not fit the outlet, have a proper outlet installed by a qualified electrician.

### Electrical Connection

To properly install your range, you must determine the type of electrical connection you will be using and follow the instructions provided for it here.

- Range must be connected to the proper electrical voltage and frequency as specified on the model/serial/rating plate. The model/serial/rating plate is located on the frame behind a top corner of the door or either side of the drawer.

- A. The model/serial/rating plate is located on the frame behind a top corner of the door or either side of the drawer.

- This range is manufactured with the neutral terminal connected to the cabinet. Use a 3-wire, UL listed, 40 or 50 A power supply cord (pigtail). See the following Range Rating chart. If local codes do not permit ground through the neutral, use a 4-wire power supply cord rated at 250 V, 40 or 50 A and investigated for use with ranges.

| Range Rating*  |                | Specified Rating of Power Supply Cord Kit and Circuit Protection |
|----------------|----------------|------------------------------------------------------------------|
| 120/240 V      | 120/208 V      | Amps                                                             |
| 8.8 - 16.5 kW  | 7.8 - 12.5 kW  | 40 or 50**                                                       |
| 16.6 - 22.5 kW | 12.6 - 18.5 kW | 50                                                               |

\* The NEC calculated load is less than the total connected load listed on the model/serial/rating plate.

\*\* If connecting to a 50 A circuit, use a 50 A rated cord with kit. For 50 A rated cord kits, use kits that specify use with a nominal 1 1/8" (34.9 mm) diameter connection opening.
