

Maytag Wringer Washer Operating Guide

Take articles from the washer and insert between the wringer rolls. Smaller articles, such as handkerchiefs, panties, socks, may be placed on larger items as they go through the wringer. Wet clothes tend to cling to the roller surface. To avoid this, start a folded edge or the center of an article through the rolls.

Before leaving washer, turn wringer control handle to neutral position to stop the rolls and press turquoise safety release bar to release tension between the wringer rolls.

TO DRAIN THE WASHER:

To lower the drain hose on non-pump models, place your left hand on the lower third of the hose, move the hose to the left and push in. With your right hand, lift the nozzle of the hose out of the bracket.

On pump models, push the lower portion of the hose in

toward the tub with your left hand while lifting the nozzle of the hose out of the bracket with the right hand. Hook curved end into sink, tub, or drainpipe and move pump control lever (located at the lower edge of the cabinet) to "ON". Washer must be plugged in to operate pump. If water flow stops with pump "ON" before the tub is emptied, move the pump lever off and on once or twice until the flow is resumed.

POWER UNIT

The power unit acts as the driving source for both the agitate and wringer operation, through the center plate for agitation, and through the safety clutch and wringer head for wringer operation.
