engineering efforts Flying higher faster and taking the enemy down before they even noticed your presence became a matter of life or death for the allied forces Allied Aircraft Piston Engines of World War II Second Edition addresses British and American developed engines It looks at the piston engines in detail as they supported amazing wins both in the heat of the air battles and on the ground supplying and giving cover to the troops This new edition fully revised by the original author Graham White offers new images and information in addition to expanded specifications on the Rolls Royce Packard Merlin and the Pratt Whitney R 2800 engines Jay Leno a known enthusiast wrote the Foreword **R-2800** Graham White,2001-08-15 This book chronicles the development production and application of what was arguably the finest aircraft piston engine ever produced the Pratt Whitney R 2800 It powered many of the significant fighters and medium bombers of the conflict and went on to power many other military and commercial aircraft **World War II Guide to Records Relating to U.S. Military Participation** Rebecca L. by analyzing the performance of the US Army and US Marine Corps in urban combat in four major urban battles of the mid twentieth century Aachen 1944 Manila 1945 Seoul 1950 and Hue 1968 Alec Wahlman assesses each battle using a similar framework of capability categories and separate chapters address urban warfare in American military thought In the four battles across a wide range of conditions American forces were ultimately successful in capturing each city because of two factors transferable competence and battlefield adaptation The preparations US forces made for warfare writ large proved generally applicable to urban warfare Battlefield adaptation a strong suit of American forces filled in where those overall preparations for combat needed fine tuning From World War Two to Vietnam however there was a gradual reduction in tactical performance in the four battles
