Synergies of Soft Computing and Statistics for Intelligent Data Analysis Rudolf Kruse, Michael R. Berthold, Christian Moewes, María Ángeles Gil, Przemysław Grzegorzewski, Olgierd Hryniewicz, 2012-09-13 In recent years there has been a growing interest to extend classical methods for data analysis. The aim is to allow a more flexible modeling of phenomena such as uncertainty imprecision or ignorance Such extensions of classical probability theory and statistics are useful in many real life situations since uncertainties in data are not only present in the form of randomness various types of incomplete or subjective information have to be handled About twelve years ago the idea of strengthening the dialogue between the various research communities in the field of data analysis was born and resulted in the International Conference Series on Soft Methods in Probability and Statistics SMPS This book gathers contributions presented at the SMPS 2012 held in Konstanz Germany Its aim is to present recent results illustrating new trends in intelligent data analysis It gives a comprehensive overview of current research into the fusion of soft computing methods with probability and statistics Synergies of both fields might improve intelligent data analysis methods in terms of robustness to noise and applicability to larger datasets while being able to efficiently obtain understandable solutions of real world problems Petroleum The Accountant's Magazine ,1971 Riccardino Andrea Camilleri, 2021-09-21 The long awaited last Abstracts ,1966 novel in the transporting and beloved New York Times bestselling Inspector Montalbano series At eighty I foresaw Montalbano's departure from the scene I got the idea and I didn't let it slip away So I found myself writing this novel which is the final chapter the last book in the series And I sent it to my publisher saying to keep it in a drawer and to publish it only when I am gone Andrea Camilleri Montalbano receives an early morning phone call but this time it s not Catarella announcing a murder but a man called Riccardino who s dialed a wrong number and asks him when he ll be arriving at the meeting Montalbano in irritation says In ten minutes Shortly after he gets another call this one announcing the customary
