Embodied, Extended, Ignorant Minds Selene Arfini, Lorenzo Magnani, 2022-05-23 This book offers a new and externalist perspective in ignorance studies Agnotology the epistemology of ignorance and more generally ignorance studies have grown to cover and explore different phenomena and subjects of research from known events in history and sociology of science to the investigation of ordinary reasoning and cognitive processing Nonetheless although interested scholars have discussed ignorance phenomena and their impact on cognition most of them have only adopted an internalist perspective to approach this theme Meanwhile even though externalist perspectives on cognition flourished in recent literature authors have paid little attention to the emerging field of ignorance studies Ignorance has been generally left out from the inquiries on the extension of cognitive states cognitive processes and predictive reasoning Thus in this volume we seek to merge the two growing areas of research and to fill this research gap fruitfully By addressing the uncomfortable themes that pertain to ignorance and related phenomena through an externalist perspective this book aims to provide much food for thoughts to cognitive scientists and philosophers alike enriching the current range and reach of both ignorance studies and externalist approaches to cognition

Online Social Media Analysis and Visualization Jalal Kawash, 2015-01-14 This edited volume addresses the vast challenges of adapting Online Social Media OSM to developing research methods and applications The topics cover generating realistic social network topologies awareness of user activities topic and trend generation estimation of user attributes from their social content behavior detection mining social content for common trends identifying and ranking social content sources building friend comprehension tools and many others Each of the ten chapters tackle one or more of these issues by proposing new analysis methods or new visualization techniques or both for famous OSM applications such as Twitter and Facebook This collection of contributed chapters address these challenges Online Social Media has become part of the daily lives of hundreds of millions of users generating an immense amount of social content Addressing the challenges that stem from this wide adaptation of OSM is what makes this book a valuable contribution to the

field of social networks **Communication and Libertarianism** Pavel Slutskiy, 2021-08-02 This is an outstanding contribution to both libertarian political philosophy and communication theory It is far and away the most comprehensive work on communication issues in libertarian theory ever published The author has integrated successfully the libertarian insights of Mises Rothbard Block Kinsella and others with the philosophy of language as developed by Austin Searle and Grice He has done so in a unique and unprecedented way The book would appeal to students and scholars interested in libertarian theory and more generally to philosophers and political scientists interested in high level scholarship David Gordon libertarian philosopher and intellectual historian Ludwig von Mises Institute *IAENG Transactions on Engineering Technologies* Haeng Kon Kim, Sio-Iong Ao, Mahyar A. Amouzegar, Burghard B. Rieger, 2013-09-12 *IAENG Transactions on Engineering Technologies* contains forty nine revised and extended research articles written by prominent researchers participating in the conference Topics covered include circuits engineering mathematics control theory communications systems systems engineering manufacture engineering computational biology chemical engineering and industrial applications This book offers the state of art of tremendous advances in engineering technologies and physical science and applications and also serves as an excellent source of reference for researchers and graduate students working with on engineering technologies and physical science and applications *Reading Justice Claims on Social Media* Phillip Santos, Cleophas T. Muneri, 2024-07-16 This book explores how unresolved questions of social justice shape the character of the political terrain and political actors through the lens of social media It treats communication as the medium through which social issues and processes are made visible Given the rise and spread of populist politics the views of ordinary people on social issues have never mattered more One platform through which these voices can be studied extensively is social media Platforms such as Facebook Twitter now X YouTube and Instagram among others afford ordinary citizens often marginalized by traditional mainstream media space to vent their opinions engage in discussions of whatever topic share information and ideas and explore various kinds of information as well as data links to which are often provided through various macro and micro discursive spaces therein Arguably therefore social media have become a quintessential platform for studying contemporary sociality Social media must be studied not just as a communication platform but one through which the social world social processes and social issues are made visible and in some cases enacted With rich case studies from the Global South and a particular focus on Africa this collection does just that Harvard Law Review: Volume 131, Number 6 - April 2018 Harvard Law Review, 2018-04-08 **New Trends in Database and Information Systems II** Nick Bassiliades, Mirjana Ivanovic, Margita Kon-Popovska, Yannis Manolopoulos, Themis Palpanas, Goce Trajcevski, Athena Vakali, 2014-08-16 This volume contains the papers of 3 workshops and the doctoral consortium which are organized in the framework of the 18th East European Conference on Advances in Databases and Information Systems ADBIS 2014 The 3rd International Workshop on GPUs in Databases GID 2014 is devoted to subjects related to utilization of Graphics Processing

Units in database environments The use of GPUs in databases has not yet received enough attention from the database community The intention of the GID workshop is to provide a discussion on popularizing the GPUs and providing a forum for discussion with respect to the GID s research ideas and their potential to achieve high speedups in many database applications The 3rd International Workshop on Ontologies Meet Advanced Information Systems OAIS 2014 has a twofold objective to present new and challenging issues in the contribution of ontologies for designing high quality information systems and new research and technological developments which use ontologies all over the life cycle of information systems The 1st International Workshop on Technologies for Quality Management in Challenging Applications TQMCA 2014 focuses on quality management and its importance in new fields such as big data crowd sourcing and stream databases The Workshop has addressed the need to develop novel approaches and technologies and to entirely integrate quality management into information system management
